Toronto Transformations In A City And Its Region Metropolitan Portraits:

Toronto Edward Relph, 2013-08-22 Extending a hundred miles across south central Ontario Toronto is the fifth largest metropolitan area in North America with the highest population density and the busiest expressway At its core old Toronto consists of walkable neighborhoods and a financial district deeply connected to the global economy Newer parts of the region have downtown centers linked by networks of arterial roads and expressways employment districts with most of the region's jobs and ethnically diverse suburbs where English is a minority language About half the population is foreign born the highest proportion in the developed world Population growth because of immigration almost three million in thirty years shows few signs of abating but recently implemented regional strategies aim to contain future urban expansion within a greenbelt and to accommodate growth by increasing densities in designated urban centers served by public transit Toronto Transformations in a City and Its Region traces the city's development from a British colonial outpost established in 1793 to the multicultural polycentric metropolitan region of today Though the original grid survey and much of the streetcar city created a century ago have endured they have been supplemented by remarkable changes over the past fifty years in the context of economic and social globalization Geographer Edward Relph's broad stroke portrait of the urban region draws on the ideas of two renowned Torontonians Jane Jacobs and Marshall McLuhan to provide an interpretation of how its current forms and landscapes came to be as they are the values they embody and how they may change once again *Toronto* E. C. Relph, 2014 Beyond Rust Allen Dieterich-Ward, 2016 Beyond Rust chronicles the rise fall and rebirth of metropolitan Pittsburgh an industrial region that once formed the heart of the world's steel production and is now touted as a model for reviving other hard hit cities of the Rust Belt Writing in clear and engaging prose historian and area native Allen Dieterich Ward provides a new model for a truly metropolitan history that integrates the urban core with its regional hinterland of satellite cities white collar suburbs mill towns and rural mining areas Pittsburgh reached its industrial heyday between 1880 and 1920 as vertically integrated industrial corporations forged a regional community in the mountainous Upper Ohio River Valley Over subsequent decades metropolitan population growth slowed as mining and manufacturing employment declined Faced with economic and environmental disaster in the 1930s Pittsburgh's business elite and political leaders developed an ambitious program of pollution control and infrastructure development The public private partnership behind the Pittsburgh Renaissance as advocates called it pursued nothing less than the selective erasure of the existing social and physical environment in favor of a modernist functionally divided landscape a goal that was widely copied by other aging cities and one that has important ramifications for the broader national story Ultimately the Renaissance vision of downtown skyscrapers sleek suburban research campuses and bucolic regional parks resulted in an uneven transformation that tore the urban fabric while leaving deindustrializing river valleys and impoverished coal towns isolated from areas of postwar growth Beyond Rust is among the first books of its kind to continue past the collapse of American manufacturing in the 1980s by

exploring the diverse ways residents of an iconic industrial region sought places for themselves within a new economic order

Streetcars and the Shifting Geographies of Toronto Brian Doucet, Michael Doucet, 2022-03-01 When looking at old pictures of Toronto it is clear that the city's urban economic and social geography has changed dramatically over the generations. Historic photos of Toronto's streetcar network offer a unique opportunity to examine how the city has been transformed from a provincial industrial city into one of North America's largest and most diverse regions. *Streetcars and the Shifting Geographies of Toronto* studies the city's urban transformations through an analysis of photographs taken by streetcar enthusiasts beginning in the 1960s. These photographers did not intend to record the urban form, function, or social geographies of Toronto; they were accidental archivists whose main goal was to photograph the streetcars themselves. But today their images render visible the ordinary day-to-day life in the city in a way that no others did. These historic photographs show a Toronto before gentrification, globalization, and deindustrialization. Each image has been rephotographed to provide fresh insights into a city that is in a constant state of flux. With gorgeous illustrations, this unique book offers an understanding of how Toronto has changed and the reasons behind these urban shifts. The visual exploration of historic and contemporary images from different parts of the city helps to explain how the major forces shaping the city affect its form, functions, neighbourhoods, and public spaces.

George Herbert Locke and the Transformation of Toronto Public Library, 1908-1937 Lorne D. Bruce, 2020-12-31 George H. Locke, chief librarian of the Toronto Public Library between 1908 and 1937, was Canada's foremost library administrator in the first part of the twentieth century. During this period, free public libraries and librarianship in Ontario expanded rapidly due to the philanthropy of Andrew Carnegie, improvements in library education, and the influence of American library services. Locke was closely associated with all these trends; however, his outlook was primarily guided by his Methodist upbringing, the Anglo-Canadian academic tradition of British Idealism, and his association with John Dewey's contribution to American progressive education. These religious and intellectual strands encouraged personal action to improve social conditions. As director of Toronto's libraries, he brought his ambitious ideas to bear in many ways: the building of neighbourhood branches, library service for children, formal education for librarians, suitable reading for immigrants and young adults, and the idea of the public library as a municipal partner in the self-education of adult Canadians. By 1930, Toronto's public library system was recognized as one of the best in North America, and George Locke's reputation as a visionary leader had vaulted him to the Presidency of the American Library Association. Although he had created a large organization that might have succumbed to bureaucratic practices and formalized centralization, Locke resisted this development. He remained faithful to his moral, intellectual, and humanistic values acquired during his early schooling and university career. For Locke, libraries and librarians were less about organization and formal duties; both needed to be faithful to the main principle of serving the public interest by delivering knowledge and by guiding individual self-development through experiential learning and transcendent ideals.

Transforming Distressed Global Communities Fritz Wagner, Riad Mahayni, Andreas Piller, 2016-03-09 Many of our global cities are distressed and facing a host of issues economic collapse in the face of rising expectations social disintegration and civil unrest and ecological degradation and the threats associated with climate change including more frequent and more severe natural disasters Our long held assumptions about man and nature and how they interact are defunct We realize now that we can no longer continue to build without addressing the long term impacts of our actions and their spillovers Energy and natural resources are finite The way we configure economies has come into question In the developed world especially in the United States infrastructure and the notions that underpin it are outdated Meanwhile the developing world is experiencing major rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements Cities are the key to our future they represent the most effective vehicle for positive advancements in the human condition and environmental change This volume argues for the need to redesign and re plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi dimensionality Presenting a range of case studies from around the world this volume examines how these distressed cities are dealing with these issues in planning for their future Alongside these empirical chapters are philosophical essays that consider the future of distressed cities Bringing together a team of leading scholars United Nations agencies non governmental organizations private consulting firms international organizations and foundations and policy officials this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places

Pictures of a Gone City Richard A. Walker, 2018-06-01 The San Francisco Bay Area is currently the jewel in the crown of capitalism the tech capital of the world and a gusher of wealth from the Silicon Gold Rush It has been generating jobs spawning new innovation and spreading ideas that are changing lives everywhere It boasts of being the Left Coast the Greenest City and the best place for workers in the USA So what could be wrong It may seem that the Bay Area has the best of it in Trump s America but there is a dark side of success overheated bubbles and spectacular crashes exploding inequality and millions of underpaid workers a boiling housing crisis mass displacement and severe environmental damage a delusional tech elite and complicity with the worst in American politics This sweeping account of the Bay Area in the age of the tech boom covers many bases It begins with the phenomenal concentration of IT in Greater Silicon Valley the fabulous economic growth of the bay region and the unbelievable wealth piling up for the 1% and high incomes of Upper Classes in contrast to the fate of the working class and people of color earning poverty wages and struggling to keep their heads above water The middle chapters survey the urban scene including the greatest housing bubble in the United States a metropolis exploding in every direction and a geography turned inside out Lastly it hits the environmental impact of the boom the fantastical ideology of TechWorld and the political implications of the tech led transformation of the bay region Toronto, 2001-08 Discover another side of Canada s biggest metropolis from the shops of downtown Yonge Street to the picturesque shores of Lake
