Understanding Media Marshall McLuhan, 2003 **The Critical Media Literacy Guide** Douglas Kellner, Jeff Share, 2019-05-20 Over half the world's population is now online interconnected through a globally networked media and consumer society The convergence of information media and technology has created the predominant ecosystem of our time Yet most educational institutions are still teaching what and how they have for centuries and are thus increasingly out of date and out of touch with our current needs The Critical Media Literacy Guide Engaging Media and Transforming Education provides a theoretical framework and practical applications for educators and teacher education programs to transform education by putting critical media literacy into action in classrooms with students from kindergarten to university Douglas Kellner and Jeff Share lay out the evolution of thinking and development of media and cultural studies from the Frankfurt School to current intersectional theories about information and power that highlight the importance of race gender class and sexuality They provide insightful and accessible entry into theorizing education and information communication technologies through linking the politics of representation with critical pedagogy The increase in fake news alternative facts bots and trolls challenge our abilities to judge credibility and recognize bias Kellner and Share present a critical lens and strategies to contextualize and analyze the dominant ideologies going viral across social media platforms and disseminated globally from enormous transnational corporations The Critical Media Literacy Guide is a powerful resource to analyze and challenge representations and narratives of multiple forms of identity privilege and oppression Since the struggle for social justice and democracy require new theories and pedagogies to maneuver the constantly changing terrain this book is essential for all educators

Re-Understanding Media Sarah Sharma, Rianka Singh, 2022-03-23 The contributors to Re Understanding Media advance a feminist version of Marshall McLuhan's key text Understanding Media The Extensions of Man repurposing his insight that the medium is the message for feminist ends They argue that while McLuhan's theory provides a falsely universalizing conception of the technological as a structuring form of power feminist critics can take it up to show how technologies alter and determine the social experiences of race gender class and sexuality This volume showcases essays experimental writings and interviews from media studies scholars artists activists and those who work with and create technology Among other topics the contributors extend McLuhan's discussion of transportation technology to the attics and cargo boxes that moved Black women through the Underground Railroad apply McLuhan's concept of media as extensions of humans to analyze Tupperware as media of containment and take up 3D printing as a feminist and decolonial practice The volume demonstrates how power dynamics are built into technological media and how media can be harnessed for radical purposes Contributors Nasma Ahmed Morehshin Allahyari Sarah Banet Weiser Wendy Hui Kyong Chun Brooke Erin Duffy
