Unification Of Tort Law Wrongfulness Principles Of European Tort Law Set:

Comparative Foundations of a European Law of Set-Off and Prescription Reinhard Zimmermann, 2002-06-27 The emergence of a European private law is one of the great issues on the legal agenda of our time Among the most prominent initiatives furthering this process is the work of the Commission on European Contract Law The essays collected in this 2002 volume have their origin within this context They explore two practically very important topics which had hitherto been largely neglected in comparative legal literature set off and extinctive prescription or limitation of actions Professor Zimmermann lays the comparative foundations for a common approach which may provide the basis for a set of European principles At the same time the essays provide practical examples of the arguments that can be employed in the process of harmonising European private law on a rational basis They explore topics such as the comparative experiences in the various modern legal systems and the direction in which the international development is heading **The Making of the Civil**

Codes Michele Graziadei, Lihong Zhang, 2022-11-21 The book provides in depth analysis of the new perspectives on codifications and of the related reforms that give recognition to new ideas new needs and new techniques The contributions from several jurisdictions collected in this book provide a much needed evaluation of the current impact of codification on the law and are a first essential reference for assessing the importance of civil law codifications in the contemporary world

The Oxford Handbook of Comparative Law Mathias Reimann, Reinhard Zimmermann, 2019-03-26 This fully revised and updated second edition of The Oxford Handbook of Comparative Law provides a wide ranging and diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty eight chapters written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field *Tort Liability of Public Authorities in European Laws* Giacinto della Cananea, Roberto Caranta, 2020-12-15 This series argues that there is a common administrative core to European legal systems that can be better understood in comparative terms This volume examines government liability in tort using case studies to explore different government responses Part I sets the

stage for the project and the parameters followed by the scholars involved Part II expands on the legal systems chosen for comparison setting up their general tort procedures Part III presents case studies from Austria the European Union France Germany Hungary Italy Poland Romania Spain Switzerland and the United Kingdom Each case study has a theoretical response detailing what would happen should that case occur within each country's borders Part IV compares and contrasts the information provided in Part III It examines both the commonalities and the distinctive traits of these legal systems with a view to understand the nature of their common core This volume is an essential tool for anyone involved in administrative and constitutional law and government liability in tort Principles of European Tort Law ,2000 Tort Law Tjong Tjin Tai, Eric,2022-09-06 This accessible textbook provides an introductory guide to tort law with a structured explanation of the key concepts and doctrines Using a comparative approach the discussion is illustrated with case law and provisions from three key jurisdictions England France and Germany With liberal reference to other codes and cases from around the world the book gives readers a contextual understanding and will appeal to classes with a global outlook **The Europeanisation of English Tort Law** Paula Giliker,2014-12-01 Tort law is often regarded as the clearest example of traditional common law reasoning Yet in the past 40 years the common law of England and Wales has been subject to European influences as a result of the introduction of the European Communities Act 1972 and more recently the implementation of the Human Rights Act 1998 in October 2000 EU Directives have led to changes to the law relating to product liability health and safety in the workplace and defamation while Francovich liability introduces a new tort imposing State liability for breach of EU law The 1998 Act has led to developments in privacy law and made the courts reconsider their approach to public authority liability and freedom of expression in defamation law This book explores how English tort law has changed as a result of Europeanisation broadly defined as the influence of European Union and European human rights law It also analyses how this influence has impacted on traditional common law reasoning Has Europeanisation led to changes to the common law legal tradition or has the latter proved more resistant to change than might have been expected Modes of Regulation in the Intermediate Field Between Contract Law and Tort Law Jiayong Zhang,2023-02-17 Il contratto Pasquale Fava,2012

An Inconvenient Deliberation Miriam Haritz,2011-01-01 This vitally important book asks Can the precautionary principle make uncertainty judiciable in the context of liability for the consequences of climate change and if so to what extent Drawing on the full range of pertinent existing literature and case law the author examines the precautionary principle both in terms of its content and application and in the context of liability law She analyses the indirect means offered by existing legislation being used by environmental groups and affected individuals before the courts to challenge both companies and regulators as responsible agents of climate change damage Page 4 of cover
