Florida Benchmark  
Review Unit 5

Choose the letter of the best answer.

- 1 In order for a space shuttle to leave Earth, it must produce a great amount of thrust. Its rocket engines create this thrusting force by burning great amounts of fuel. However, once in space, the shuttle needs very little fuel. It circles Earth while gravity pulls it toward Earth. What term describes the motion of the shuttle around Earth?
- A. orbit                                      C. inertia  
B. gravity                                  D. weight
- 2 A weather station records the wind blowing from the northeast at 12 km/h. Which statement explains why northeast at 12 km/h is a vector?
- A. The speed is given in km/h.  
B. The speed is a constant value.  
C. Speed and direction are given.  
D. An average speed is reported.
- 3 One ball rolls along a shelf at a steady rate. A second ball rolls off the shelf and gains speed as it falls in a curved path. Which must have an unbalanced force acting on it?
- A. the ball that is rolling along the shelf  
B. the ball that is falling  
C. both balls  
D. neither ball
- 4 Penny says that dust particles in space cannot be pulled together by the force of gravity because dust particles have very little mass. Ella says that as long as dust particles have mass at all, the force of gravity can pull dust particles toward each other. Who has the better argument, and why?
- A. Penny, because objects with only a little mass are not affected by gravity.  
B. Penny, because dust particles in space are not orbiting Earth.  
C. Ella, because any two objects exert a gravitational force on each other.  
D. Ella, because objects with smaller mass have more gravity acting on them.

**Science California, Level 2** Houghton Mifflin, 2007      Designs for Science Literacy American Association for the Advancement of Science, 2001-03-22 The call for science curriculum reform has been made over and over again for much of the twentieth century Arguments have been made that the content of the curriculum is not appropriate for meeting the individual and social needs of people living in the modern world that the curriculum has become overstuffed with topics and does not serve students especially well and above all that the curriculum does not generate the student learning it is expected to produce The latest volume in a continuing series of publications from the AAAS designed to reform science education Designs for Science Literacy presupposes that curriculum reform must be considerably more extensive and fundamental than the tinkering with individual courses and subjects that has been going on for decades Designs deals with the critical issues involved in assembling sound instructional materials into a new coherent K 12 whole The book pays special attention to the need to link science oriented studies to the arts and humanities and also proposes how to align the curriculum with an established set of learning goals while preserving the American tradition of local responsibility for the curriculum itself If fundamental curriculum reform is ever to occur a new process for creating alternatives will have to be developed Designs for Science Literacy provides the groundwork for such a process      **Intelligent Computer Graphics 2012** Dimitri Plemenos, Georgios Miaoulis, 2012-08-29 In Computer Graphics the use of intelligent techniques started more recently than in other research areas However during these last two decades the use of intelligent Computer Graphics techniques is growing up year after year and more and more interesting techniques are presented in this area The purpose of this volume is to present current work of the Intelligent Computer Graphics community a community growing up year after year This volume is a kind of continuation of the previously published Springer volumes Artificial Intelligence Techniques for Computer Graphics 2008 Intelligent Computer Graphics 2009 2009 Intelligent Computer Graphics 2010 2010 and Intelligent Computer Graphics 2011 2011 Usually this kind of volume contains every year selected extended papers from the corresponding 3IA Conference of the year However the current volume is made from directly reviewed and selected papers submitted for publication in the volume Intelligent Computer Graphics 2012 This year papers are particularly exciting and concern areas like plant modelling text to scene systems information visualization computer aided geometric design artificial life computer games realistic rendering and many other very important themes      *Extension Service Review* United States.
