University in Chains Henry A. Giroux, 2015-10-23 President Eisenhower originally included academic in the draft of his landmark oft quoted speech on the military industrial complex Giroux tells why Eisenhower saw the academy as part of the famous complex and how his warning was vitally prescient for 21st century America Giroux details the sweeping post 9 11 assault being waged on the academy by militarization corporatization and right wing fundamentalists who increasingly view critical thought itself as a threat to the dominant political order Giroux argues that the university has become a handmaiden of the Pentagon and corporate interests it has lost its claim to independence and critical learning and has compromised its role as a democratic public sphere And yet in spite of its present embattled status and the inroads made by corporate power the defense industries and the right wing extremists Giroux defends the university as one of the few public spaces left capable of raising important questions and educating students to be critical and engaged agents He concludes by making a strong case for reclaiming it as a democratic public sphere

American Hegemony after the Great Recession Brandon Tozzo, 2017-10-17 This book traces America's rise as a hegemon of the capitalist system arguing that the greatest threat to global economic stability is America's polarized and ineffectual political system rather than foreign competition from China and the European Union The author points to China's considerable demographic problem which will likely undermine its economic potential Furthermore the sovereign debt crisis in Europe which has left the continent politically fragmented by an institutional malaise is evidence of the United States continued status as the world's most successful nation Tozzo posits that due to factors such as its initial response to the financial crisis the near failure of its banking system the catastrophe of the debt ceiling crisis and the election of Donald Trump as president the greatest threat to American hegemony is America itself

Politics of Possibility Gary A. Olson, Lynn Worsham, Henry A. Giroux, 2015-12-03 In the probing interviews in this vibrant new book eminent scholars struggle with some of the most crucial issues facing contemporary intellectuals Poststructuralist philosopher Judith Butler discusses the

pain of rigorous intellectual work saying that it is necessarily extremely hard labor as she examines the intersection of discourse and political action Award winning filmmaker philosopher and social theorist David Theo Goldberg reviews his life's work especially on issues of racism Literary critic and feminist philosopher Avital Ronell sets out to disrupt the standard logic of signification to force readers into fresh ways of perceiving a subject at hand Postcolonial theorist Homi Bhabha discusses how critical literacy is intimately connected to the question of democratic representation and he elaborates on how cultural difference can lead to a politics of discrimination And neo Marxist cultural critic Slavoj Žižek takes readers on an exhilarating journey through a wide range of critical subjects American Amnesia Jacob S. Hacker, Paul

Pierson, 2016-03-29 A provocative Kirkus Reviews timely and topical work that examines what's good for American business and what's good for Americans and why those interests are misaligned In American Amnesia bestselling political scientists Jacob S. Hacker and Paul Pierson trace the economic and political history of the United States over the last century and show how a viable mixed economy has long been the dominant engine of America's prosperity We have largely forgotten this reliance as many political circles and corporate actors have come to mistakenly see government as a hindrance rather than the propeller it once was American Amnesia is more than a rhetorical phrase elites have literally forgotten or at least forgotten to talk about the essential role of public authority in achieving big positive-sum bargains in advanced societies The mixed economy was the most important social innovation of the twentieth century It spread a previously unimaginable level of broad prosperity It enabled steep increases in education health longevity and economic security And yet extraordinarily it is anathema to many current economic and political elites Looking at this record of remarkable accomplishment they recoil in horror And as the advocates of anti-government free market fundamentalism have gained power they are hell-bent on scrapping the instrument of nearly a century of unprecedented economic and social progress In American Amnesia Hacker and Pierson explain the full story of how government helped make America great how the enthusiasm for bashing government is behind its current malaise and how a return to effective government is the answer the nation is looking for The New York Times *Higher Education, Policy, and the Global Competition Phenomenon* V. Rust, L. Portnoi, S.

Bagley, 2010-03-29 This book inquires about the processes through which different higher education systems have determined national higher education policies related to competitiveness as well as the strategies they have adopted to enhance their global competitiveness **The Alternative University** Mariya P. Ivancheva, 2023-06-13 Over the last few decades the decline of the public university has dramatically increased under intensified commercialization and privatization with market-driven restructurings leading to the deterioration of working and learning conditions A growing reserve army of scholars and students who enter precarious learning teaching and research arrangements have joined recent waves of public unrest in both developed and developing countries to advocate for reforms to higher education Yet even the most visible campaigns have rarely put forward any proposals for an alternative institutional organization Based on extensive fieldwork in

Venezuela The Alternative University outlines the origins and day to day functioning of the colossal effort of late President Hugo Chavez's government to create a university that challenged national and global higher education norms Through participant observation extensive interviews with policymakers senior managers academics and students as well as in depth archival inquiry Mariya Ivancheva historicizes the Bolivarian University of Venezuela UBV the vanguard institution of the higher education reform and examines the complex and often contradictory and quixotic visions policies and practices that turn the alternative university model into a lived reality This book offers a serious contribution to debates on the future of the university and the role of the state in the era of neoliberal globalization and outlines lessons for policymakers and educators who aspire to develop higher education alternatives

Humanism in the Modern World Jeff Radwell, 2025-02-27 In an era of misinformation digital spectacle and declining literacy this book examines the historical resilience of humanism and the challenges it faces in the modern world From the Renaissance scholars who revived intellectual inquiry to the revolutionary salons labor halls and universities that fostered debate and dissent humanist thought has always thrived in moments of resistance But today new forces algorithmic manipulation social media driven self worth and the dominance of visual culture threaten to erode the very foundations of reason autonomy and personal dignity This book explores how humanist values have historically been challenged and how they prevailed offering a comparative analysis between past intellectual struggles and today's crises of thought and identity It delves into how the digital age while democratizing information has also fragmented attention heightened social comparison and replaced depth with spectacle The decline of reading culture the rise of aestheticized self worth and the transformation of universities into elite corporatized institutions have all contributed to an environment where critical thinking is devalued history is flattened and intellectual engagement is increasingly passive Yet as history shows humanist resistance adapts This book does not merely diagnose the problem it seeks solutions exploring how modern intellectuals digital creators and educators can reclaim humanism for a new age From rethinking the role of universities to fostering meaningful discourse in digital spaces it argues that humanism must evolve without surrendering to a surface level algorithmic world By drawing lessons from the past and applying them to the present this book offers a roadmap for reviving intellectual depth reinforcing individual autonomy and ensuring that humanism remains a guiding force in an increasingly mechanized and visually driven society It is a call to resist

intellectual passivity to reclaim knowledge as a public good and to defend the essential humanist belief that self worth is not found in metrics but in thought creativity and the lifelong pursuit of meaning **Guys and Guns Amok** Douglas

Kellner,2015-12-03 From the recent shootings at Virginia Tech University to the tragedies at Columbine and Oklahoma City certain common traits can be traced through all of these events In Guys and Guns Amok media and cultural critic Douglas Kellner provides a fascinating diagnostic reading of these acts of domestic terrorism Skillfully connecting each case with the current environment for male socialization and the search for identity in an American culture obsessed with guns and militarism Kellner s work is a sobering reflection on these tragedies and the pervasive power of media and popular culture as well as a wake up call for the future **Of Divine Warning** Jane Anna Gordon,Lewis R. Gordon,2015-11-17 This book offers

a theory of disaster in modern and contemporary society and its impact on the construction of social and political life The theory is premised upon what the authors call the sign continuum where disaster spreads across society through efforts to evade social responsibility for its causes and consequences Phenomena generated by such efforts include the social manifestation of monstrosity disastrous people and other forms of living things and an emerging antipolitics in an effort to assert rule and order A crucial development is the attack on speech a fundamental feature of political life as manifested by the increased expectations of categories of people whose containment calls for shunning and silence **Naming Violence**

Mathias Thaler,2018-09-11 Much is at stake when we choose a word for a form of violence whether a conflict is labeled civil war or genocide whether we refer to enhanced interrogation techniques or to torture whether a person is called a terrorist or a patriot Do these decisions reflect the rigorous application of commonly accepted criteria or are they determined by power structures and partisanship How is the language we use for violence entangled with the fight against it In Naming Violence Mathias Thaler articulates a novel perspective on the study of violence that demonstrates why the imagination matters for political theory His analysis of the politics of naming charts a middle ground between moralism and realism arguing that political theory ought to question whether our existing vocabulary enables us to properly identify understand and respond to violence He explores how narrative art thought experiments and historical events can challenge and enlarge our existing ways of thinking about violence Through storytelling hypothetical situations and genealogies the imagination can help us see when definitions of violence need to be revisited by shedding new light on prevalent norms and uncovering the contingent history of ostensibly self evident beliefs Naming Violence demonstrates the importance of political theory to debates about violence across a number of different disciplines from film studies to history **Against Schooling** Stanley

Aronowitz,2015-12-03 In Against Schooling Stanley Aronowitz passionately raises an alarm about the current state of education in our country Discipline and control over students Aronowitz argues are now the primary criteria of success and genuine learning is sacrificed to a new educational militarism In an age where school districts have imposed testing teachers must teach to test and both teacher and student are robbed of their autonomy and creativity The crisis extends to higher

education where all but a few elite institutions are becoming increasingly narrowly focused and vocational in their teaching. With education lacking opportunity for self reflection on broad social and historical dynamics. Against Schooling asks How will society be able to solve its most pressing problems. Aronowitz proposes innovative approaches to get schools back on track.

Critical ELT Practices in Asia Kiwan Sung, Rod Pederson, 2012-09-13 This is the first and long awaited work on critical approaches to teaching English for the purposes of democracy and social justice that challenges the current views of ELT such as English being merely a tool for communication or the acquisition of basic skills or high test scores for advancement in education and the marketplace. A timely work and a fresh look at critical approaches to ELT in Asia. An invaluable work that simultaneously problematizes current ELT practices while introducing new possibilities for critical practices in localized contexts in Asia. An important work that shines a light on how the forces of globalization not only dictate the spread of English as an international language but how these forces also dictate what is taught and how. An informative view on how ELT practices are being re envisioned by critical educators in Asia. This groundbreaking volume compiling critical perspectives of English language teaching in China, Hong Kong, Indonesia, Korea, and Sri Lanka confronts colonial legacies observed in educational practices and policies that perpetuate a divide between the privileged and the underprivileged. The critical reflections scrutinize the nature of English as a commodified gatekeeper and simultaneously provide alternative visions for language education. Ryuko Kubota, Professor, The University of British Columbia.

Politics After Hope Henry A. Giroux, 2015-12-03 As the new administration moved beyond its first year in office, Obama's politics of hope increasingly has been transformed into a politics of accommodation. To many of his supporters, his quest for pragmatism and realism has become a weakness rather than a strength. By focusing on those areas where Obama grounded his own sense of possibility, Giroux critically investigates the well being and future of young people, including the necessity to overcome racial injustices, the importance of abiding by the promise of a democracy to come, and the indisputable value of education in democracy. Giroux shows why considerations provide the ethical and political foundations for enabling hope to live up to its promises while making civic responsibility and education central to a movement that takes democracy seriously.

Where Do We Go from Here? Mark Major, 2010-01-01 Progressive politics has long been in crisis in the United States. As the radical Left realizes the dire consequences of defining themselves solely by what they are against, this collection challenges leading engaged academics and activists to show how radical politics can lead to a more fruitful democracy. Dealing with pressing issues of the day such as health care, race, immigration, religion, foreign policy, unions, feminism, liberalism, education, and the media, this edited volume looks at the prospects for a progressive turn in U.S. politics. In doing so, it hopes to inspire the radical imagination by showing where we can go from here. As technology continues to enable greater access to ideas around the world, the power of intellectuals is greater than ever. And given that the world is full of crushing poverty, sexism, uneven development, environmental degeneration, religious fanaticism, racism, and imperialism, the need for intellectuals to inspire the

radical imagination by championing principles of economic and social justice democracy and universality is also greater than ever However political visions are required to guide that struggle This is the aim of this book Crises of Imagination, Crises of Power Max Haiven, 2014-03-13 Today when it seems like everything has been privatized when austerity is too often seen as an economic or political problem that can be solved through better policy and when the idea of moral values has been commandeered by the right how can we re imagine the forces used as weapons against community solidarity ecology and life itself In this stirring call to arms Max Haiven argues that capitalism has colonized how we all imagine and express what is valuable Looking at the decline of the public sphere the corporatization of education the privatization of creativity and the power of finance capital in opposition to the power of the imagination and the growth of contemporary social movements Haiven provides a powerful argument for creating an anti capitalist commons Capitalism is not in crisis it is the crisis and moving beyond it is the only key to survival Crucial reading for all those questioning the imposition of austerity and hoping for a fairer future beyond it *Imagining Climate Engineering* Jeroen Oomen, 2021-05-03 This book highlights the increasing attention for climate engineering a set of speculative technologies aimed to counter global warming What is the future of the global climate And who gets to decide or even design this future *Imagining Climate Engineering* explores how and why climate engineering became a potential approach to anthropogenic climate change Specifically it showcases how views on the future of climate change and climate engineering evolved by addressing the ways in which climate engineers view its respective physical political and moral domains Tracing the intellectual and political history of dreams to control the weather and climate as well as the discovery of climate change Jeroen Oomen examines the imaginative parameters within which contemporary climate engineering research takes place Introducing the analytical metaphor ways of seeing to describe explicit or implicit visions understandings and foci that facilitate a particular understanding of what is at stake *Imagining Climate Engineering* shows how visions on the knowability of climate tie into moral and political convictions about the possibility and desirability of engineering the climate Marrying science and technology studies and the environmental humanities Oomen provides crucial insights for the future of the climate change debate for scholars and students **The Palgrave Handbook of Educational Thinkers** Brett A. Geier, 2024-08-21 This handbook presents a durable comprehensive and up to date resource covering the seminal thinkers in education of past and present Each entry will capture the professional background of a legendary thinker and presents their key insights new thinking and major legacies to the field of education Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this handbook provides a unique history and overview of figures who have shaped education and educational thinking throughout the world *Feels Right* Kemi Adeyemi, 2022-08-29 In *Feels Right* Kemi Adeyemi presents an ethnography of how black queer women in Chicago use dance to assert their physical and affective rights to the city Adeyemi stages the book in queer dance parties in gentrifying neighborhoods where good feelings are good

business But feeling good is elusive for black queer women whose nightlives are undercut by white people heterosexuality neoliberal capitalism burnout and other buzzkills Adeyemi documents how black queer women respond to these conditions how they destroy DJ booths argue with one another dance slowly and stop partying altogether Their practices complicate our expectations that life at night on the queer dance floor or among black queer community simply feels good Adeyemi's framework of feeling right instead offers a closer kinesthetic look at how black queer women adroitly manage feeling itself as a complex right they should be afforded in cities that violently structure their movements and energies What emerges in *Feels Right* is a sensorial portrait of the critical black queer geographies and collectivities that emerge in social dance settings and in the broader neoliberal city Duke University Press Scholars of Color First Book Award recipient
