Bischoff, Deborah

Cole, Amy V. Fountain, Mizuki Miyashita, 2013-05-28 This edited collection presents two sets of interdisciplinary conversations connecting theoretical methodological and ideological issues in the study of language In the first section Approaches to the study of the indigenous languages of the Americas the authors connect historical theoretical and documentary linguistics to examine the crucial role of endangered language data for the development of biopsychological theory and to highlight how methodological decisions impact language revitalization efforts Section two Approaches to the study of voices and ideologies connects anthropological and documentary linguistics to examine how discourses of language contact endangerment linguistic purism and racism shape scholarly practice and language policy and to underscore the need for linguists and laypersons alike to acquire the analytical tools to deconstruct discourses of inequality Together these chapters pay homage to the scholarship of Jane H Hill demonstrating how a critical interdisciplinary linguistics narrows the gap between disparate fields of analysis to treat the ecology of language in its entirety **Language Contact and Change in the Americas**

Andrea L. Berez-Kroeker, Diane M. Hintz, Carmen Jany, 2016-04-19 This unique collection of articles in honor of Marianne

Mithun represents the very latest in research on language contact and language change in the Indigenous languages of the Americas. The book aims to provide new theoretical and empirical insights into how and why languages change especially with regard to contact phenomena in languages of North America, Meso America and South America. The individual chapters cover a broad range of topics including sound change, morphosyntactic change, lexical semantics, grammaticalization, language endangerment and discourse/pragmatic change. With chapters from distinguished scholars and talented newcomers alike, this book will be welcomed by anyone with an interest in internally and externally motivated language change. *The Languages and Linguistics of Mexico and Northern Central America* Søren Wichmann, 2024-12-16. The handbook provides a thorough survey of the languages pertaining to the Mesoamerican culture region including a wealth of new research on synchronic structures and historical linguistics of lesser known languages, also including sign languages. The volume moreover features overviews of recent research on topics such as language acquisition and the expression of spatial orientation across languages of the region. Typology of Pluractional Constructions in the Languages of the World Simone Mattioli, 2019-04-24. The aim of this book is to give the first large scale typological investigation of pluractionality in the languages of the world. Pluractionality is defined as the morphological modification of the verb to express a plurality of situations that can additionally involve a plurality of participants and/or spaces. Based on a 246 language sample, the main characteristics of pluractionality are described and discussed throughout the book. Firstly, a description of the functions that pluractional markers cross-linguistically express is presented and the relationships occurring among them are explained through the semantic map model. Then, the marking strategies that languages display to express such functions are illustrated and some issues concerning the formal identification are briefly discussed as well. The typological generalizations are corroborated showing how pluractional markers work in three specific languages: Akawaio, Beja, Maa. In conclusion, the theoretical conceptualization of pluractionality is discussed referring to the Radical Construction Grammar approach.

Finiteness and Nominalization Claudine Chamoreau, Zarina Estrada-Fernández, 2016-06-23. This volume addresses the relation between finiteness and nominalization, which is far more complex than the simple opposition finite/nonfinite. The contributions analyze finiteness cross-linguistically from both synchronic and diachronic perspectives, focusing on a number of topics that has not been thoroughly explored in the literature. First, the correlation between finiteness and nominalization is also affected by a third factor: information structure. Second, there is a correlation between the continuum of finiteness and the scale from main independent clauses to dependent clauses. Given that nominalized constructions occur not only in dependent clauses but also in independent clauses, it is possible to grade according to degree of nominalization, which can then be related to the scale of finiteness. Finally, each of these scales can also be seen as a product of the diachronic process of re-finitization and of finitization. **Formal Studies in Slovenian Syntax** Franc Lanko Marušič, Rok Žaucer, 2016-12-15. Although in the early days of generative linguistics Slovenian was rarely called on in the development of theoretical models

the attention it gets has subsequently grown so that by now it has contributed to generative linguistics a fair share of theoretically important data With 13 chapters that all build on Slovenian data this book sets a new milestone The topics discussed in the volume range from Slovenian clitics which are called on to shed new light on the intriguing Person Case Constraint and to provide part of the evidence for a new generalization relating the presence of the definite article and Wackernagel clitics to functional elements such as the future auxiliary and possibility modals the latter of which are discussed also from the perspective of language change Even within the relatively well researched topics like wh movement new findings are presented both in relation to the structure of the left periphery and to the syntax of relative clauses

Highly complex syllable structure: A typological and diachronic study Shelece Easterday, 2019-11-13 The syllable is a natural unit of organization in spoken language whose strongest cross linguistic patterns are often explained in terms of a universal preference for the CV structure Syllable patterns involving long sequences of consonants are both typologically rare and theoretically marginalized with few approaches treating these as natural or unproblematic structures This book is an investigation of the properties of languages with highly complex syllable patterns The two aims are i to establish whether these languages share other linguistic features in common such that they constitute a distinct linguistic type and ii to identify possible diachronic paths and natural mechanisms by which these patterns come about in the history of a language These issues are investigated in a diversified sample of 100 languages 25 of which have highly complex syllable patterns Languages with highly complex syllable structure are characterized by a number of phonetic phonological and morphological features which serve to set them apart from languages with simpler syllable patterns These include specific segmental and suprasegmental properties a higher prevalence of vowel reduction processes with extreme outcomes and higher average morpheme word ratios The results suggest that highly complex syllable structure is a linguistic type distinct from but sharing some characteristics with other proposed holistic phonological types including stress timed and consonantal languages The results point to word stress and specific patterns of gestural organization as playing important roles in the diachronic development of these patterns out of simpler syllable structures Typological Hierarchies in Synchrony and Diachrony

Sonia Cristofaro, Fernando Zúñiga, 2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity Explanations for typological hierarchies however are usually based on the synchronic properties of the patterns described by individual hierarchies not the actual diachronic processes that give rise to these patterns cross linguistically This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies To this end diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology historical linguistics and language documentation This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general For this reason the book will be of

interest not only to the broad typological community but also historical linguists cognitive linguists and psycholinguists
