Cannon, 1924 **Vegetation Survey and Classification of Subtropical Forests of Southern Africa** Ladislav Mucina, 2017-12-19 This book highlights classification patterns and underlying ecological drivers structuring the vegetation of selected indigenous subtropical forests in South Africa It uses original field sampling and advanced numerical data analysis to examine three major types of forest Albany Coastal Forests Pondoland Coastal Scarp and Eastern Scarp all of which are of high conservation value Offering a unique and systematic assessment of South African ecology in unprecedented detail the book could serve as a model for future vegetation surveys of forests not only in Africa but also around the globe Biogeography and Ecology of Southern Africa Marinus J.A. Werger, A.C. van Bruggen, 2012-12-06 Southern Africa is certainly not a naturally bounded area so that there are several possibilities for delineating it and concepts about its extent Wellington discussed the various possibilities for delineation and suggested that one line stands out more clearly and definitely as a physical boundary than any other namely the South Equatorial Divide the watershed between the Zaïre Cuanza and Rufiji Rivers on the one hand and the Zambezi Cunene and Rovuma Rivers on the other This South Equatorial Divide is indeed a major line of separation for some organisms and is also applicable in a certain geographical sense though it does not possess the slightest significance for many other groups of organisms ecosystems or geographical and physical features of Africa The placing of the northern boundary of southern Africa differs in fact strongly per scientific discipline and is also influenced by practical considerations regarding the possibilities of scientific work as subordinate to certain political realities and historically grown traditions This is illustrated for example in such works as the Flora of Southern Africa where the northern boundary of the area is conceived as the northern and eastern political boundaries of South West Africa South Africa and Swaziland Botswana traditionally included in the area covered by the Flora Zambesiaca thus forms a large wedge in Southern Africa **The South African Geographical Journal** , 1929 Vols for 1932 1940 contain Cape Geographical Society Report Important Plant Areas in Southern Africa Tamara Jane Smith, 2005 *Plants of Southern Africa* T.
