Venice in Environmental Peril? Dominic Standish, 2011-12-14 Venice and its environment are perceived to be in peril due to rising sea levels tourism and modern development Are these threats myths or reality This book explores Venice's environmental risks based on interviews with Venetian environmental campaigners and draws on the mythology of the Venetian Republic Campaigners' opinions about the mobile dams nearing completion to protect the city reveal that Venice now represents an environmentally threatened retreat from modernity This reputation has been established as sustainable development and climate change policies have risen to the top of political agendas in many cities and countries The book investigates how environmentalism has been transformed from a theory underpinning counter cultural movements to part of a dominant holistic culture in Western societies Rather than constraining Venice in search of a mythical harmony with nature this book offers a ten point proposal to modernize the city while preserving its ancient heritage *Venice in Environmental Peril?* Dominic Standish, 2011-12-14 Venice and its environment are perceived to be in peril due to rising sea levels tourism and modern development Are these threats myths or reality This book explores Venice's environmental risks based on interviews with Venetian environmental campaigners and draws on the mythology of the Venetian Republic Campaigners' opinions about the mobile dams nearing completion to protect the city reveal that Venice now represents an environmentally threatened retreat from modernity This reputation has been established as sustainable development and climate change policies have risen to the top of political agendas in many cities and countries The book investigates how environmentalism has been transformed from a theory underpinning counter cultural movements to part of a dominant holistic culture in Western societies Rather than constraining Venice in search of a mythical harmony with nature this book offers a ten point proposal to modernize the city while preserving its ancient heritage The Erosion of the American Sporting Ethos ... Reconsidered Joel Nathan Rosen, 2021-01-01 This work examines American sport from its traditional roots to the influence of the 1960s era counterculture and the rise of a post Cold War ethos that reinterprets competition as a relic of a misbegotten past and anathema to American life Tourism's Horizon Jim Butcher, 2025-10-06 Drawing on the work of internationally renowned scholars and experts this volume provides a provocative stimulating and challenging exploration of the future of tourism in the context of growing global mobility environmental challenges and social shifts *Why Cities Look the Way They Do* Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in

marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original *Why Cities Look the Way They Do* will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention

Earthly Engagements Matthew C. Ally, Damon Boria, 2023-03-16 *Earthly Engagements* Reading Sartre after the Holocene brings together scholars from the Sartre studies community to think through the planetary ecological crisis Edited by Matthew C Ally and Damon Boria the collection explores ways in which Sartre's existential thought can be read socio ecologically illuminating the tightly imbricated earthly and worldly crises of our post Holocene epoch Contributors variously discuss phenomenology ethics politics ontology and metaphysics Earthly locations include the Icelandic coast the Minnesota woods the Indiana Dunes the Chinese Great Plain the Venetian Lagoon and more worldly situations include that of the artist the activist the consumer the tourist and more Through their diversity of methods and substantive concerns the chapters reveal a wealth of critical and heuristic resources within Sartre's thought for thinking through and engaging the planetary ecological crisis and its direct ties to global social economic and political crises In full recognition of Sartre's personal distaste for agrarian settings and wilderness and some ostensibly anti environmental philosophical and literary moments the contributors take the proper Sartrean line that how we view nature and our relationship to nature is neither closed nor predetermined Like life itself our worldly relationship to earthly nature is rooted in the sufficiency and open endedness of freedom
