

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

- This watch does not have a city code that corresponds to the Greenwich Mean Time differential of -3.5 hours. Because of this, the radio-controlled atomic timekeeping function will not display the correct time for Newfoundland, Canada.

Keep the watch exposed to bright light

Bright light

The electricity generated by the solar cell of the watch is stored by a built-in battery. Leaving or using the watch where it is not exposed to light causes the battery to run down. Make sure the watch is exposed to light as much as possible.

- When you are not wearing the watch on your wrist, position the face so it is pointed at a source of bright light.
- You should try to keep the watch outside of your sleeve as much as possible. Even if the face of the watch is blocked only partially from light, charging will be reduced significantly.

- The watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch functions to be disabled. If the battery goes dead, you will have to re-configure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

General Guide

Manual Receive

Hold down (D) for about two seconds.

Receive Status Check

Press (D).

Transmitter Change Time/Date Adjustment

Press any button.

Timekeeping Mode

Hold down (D) for about two seconds.

Press (D).

- Whenever you enter the Timekeeping, Countdown Timer, World Time, or Alarm Mode, the hands of the watch move to the applicable time for that mode. Even if the hands are moving, you can press (D) to move to another mode (except for the Stopwatch Mode), if you want. Note, however, that all other buttons are disabled while the hands are moving.

Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting accordingly.

- Supported time calibration signals: Germany (Mainflingen), England (Antwort), United States (Fort Collins), Japan (Fukushima or Fukushima/Saga).
- See the information under "Signal Reception Troubleshooting" if you experience problems with time calibration signal reception.

Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You also can perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home City, which is the city where you normally will use the watch. For more information, see "To specify your Home City".
- When using the watch outside the areas covered by the time signal transmitters, you will have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual time settings.
- The U.S. time calibration signal can be picked up by the watch while in North America. The term "North America" in this manual refers to the area that consists of Canada, the continental United States, and Mexico.

To specify your Home City

- In the Timekeeping Mode, hold down (D) for about five seconds until the watch beeps twice.
 - The stopwatch second hand will move to the city code of the currently selected Home City. This is the city code setting mode.
 - The second hand will stop at "10".
 - Some models show "60" instead of "10".
- Use (D) to move the stopwatch second hand to the city code you want to use as your Home City.
 - Each press of (D) causes the stopwatch second hand to advance clockwise to the next city code.
 - Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your Home City.
 - For full information on city codes, see the "City Code Table".

- The actual level at which some functions are disabled depends on the watch model.
- Be sure to read "Power Supply" for important information you need to know when replacing the watch's battery.

If the analog hands aren't moving...

- If the analog hands aren't moving, it means that the power saving mode has stopped them to save battery power.
- See "Power Saving" for more information.
- The hands also stop when the watch's battery runs down.

About This Manual

- Depending on your watch's model number, the printing on its face will look like that shown either in Figure A or Figure B. All of the illustrations in this manual use the face shown in Figure A.

Figure A

Figure B

- Button operations are indicated using the letters shown in the illustration.
- Each section of this manual provides you with the information you need in order to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

Alarm Mode

Timekeeping Mode

Press (D) (when the stopwatch is near to all zeros.)

World Time Mode

Countdown Timer Mode

Press (D) or (D).

Germany/K. Signal			Japan Signal			U.S. Signal		
City Code	City Name	City Code	City Name	City Code	City Name	City Code	City Name	City Name
LON	London	WKS	Hong Kong	FWL	Frankfurt	GRN	Greenwich	
PAR	Paris	TYO	Tokyo	ANC	Anchorage	CHI	Chicago	
ATL	Atlanta			LAX	Los Angeles	NYC	New York	

- In addition to the above, you also can select city codes that are outside the ranges of the time calibration signal transmitters supported by this watch.
- Note that this watch does not have a city code that corresponds to Newfoundland.

- After the Home City setting is the way you want, press (D) to return to the Timekeeping Mode.

- Normally, your watch should show the correct time as soon as you specify your Home City code. If it does not, it should adjust automatically after the next auto receive operation. You also can perform manual receive or you can set the time manually.

- Even if the time calibration signal is received correctly, there are some times when the analog hands may not indicate the correct time. If this happens, use the procedures under "Adjusting the Home Positions" to check the home positions of the hands, and make adjustments as required.

Daylight Saving Time (DST)

Daylight Saving Time (summer time) advances the time setting by one hour from Standard Time. Remember that not all countries or even local areas use Daylight Saving Time.

The time calibration signals transmitted from Mainflingen (Germany), Antwort (England), or Fort Collins (the United States) include both Standard Time and DST.

- When the Auto DST setting is turned on, the watch switches between Standard Time and DST (summer time) automatically in accordance with the signals.
- Though the time calibration signal transmitted by the Fukushima and Fukushima/Saga, Japan transmitters include summer time data, summer time currently is not implemented in Japan (as of 2007).

- The default DST setting is Auto DST (AT=OFF) whenever you select LON, PAR, ATL, ANC, LAX, ENH, CHI, NYC, or TYO as your Home City code.

- If you experience problems receiving the time calibration signal in your area, it probably is best to switch between Standard Time and Daylight Saving Time (summer time) manually. For more information, see "To set the time and date manually".
