Mastering Fear Rikke Schubart,2018-07-12 *Mastering Fear* analyzes horror as play and examines what functions horror has and why it is adaptive and beneficial for audiences It takes a biocultural approach and focusing on emotions gender and play it argues we play with fiction horror In horror we engage not only with the negative emotions of fear and disgust but with a wide range of emotions both positive and negative The book lays out a new theory of horror and analyzes female protagonists in contemporary horror from child to teen adult middle age and old age Since the turn of the millennium we have seen a new generation of female protagonists in horror There are feisty teens in *The Vampire Diaries* 2009 2017 troubled mothers in *The Babadook* 2014 and struggling women in the New French extremity with *Martyrs* 2008 and *Inside* 2007 At the fuzzy edges of the genre are dramas like *Pan's Labyrinth* 2006 and *Black Swan* 2010 and middle age women are now protagonists with Carol in *The Walking Dead* 2010 and Jessica Lange's characters in *American Horror Story* 2011 Horror is not just for men but also for women and not just for the young but for audiences of all ages **National**

perspectives on a multipolar order Benjamin Zala,2021-10-26 The global distribution of power is changing But how should we make sense of this moment of transition With the rise of new powers and the decline of seemingly unchallenged US dominance in world politics a conventional wisdom is gaining ground that a new multipolar order is taking shape Yet multipolarity an order with multiple centres of power is variously used as a description of the current distribution of power of the likely shape of a future global order or even as a prescription for how power should be distributed in the international system To understand the power of the different and sometimes competing narratives on offer today about the changing global order a global perspective is necessary This book explores how the concept of a multipolar order is being used for different purposes in different national contexts From rising powers to established powers contemporary debates are analysed by a set of leading scholars to provide in depth insight into the use and abuse of a widely employed but rarely explored concept **Cybernetic Capitalism** Jan Overwijk,2025-01-07 This book offers a conceptual interrogation of how capital navigates its cybernetic environment Taking an immanent perspective the book develops a unique synthesis between Niklas Luhmann's systems theory and the critical theory tradition Overwijk shows how neoliberal capitalism's version of rationalization depends on the organization and management of society on the basis of cybernetic principles Overwijk seeks to update earlier critiques of cybernetic capitalism that stressed the system's colonization of its environment its making the entirety of social life communicable Under today's cybernetic rationalization things are radically different Neoliberal political economy aims to incite the incalculability of the market platform capitalists venture to capitalize on the unpredictable efforts

of their users and post Fordist management seeks to encourage the creativity of service workers As this book uniquely shows capital no longer aims at total communicability but instead seeks to provoke and exploit the incommunicability of its environment In this sense it offers an ecological theory of capitalism laying conceptual the groundwork for understanding the extractivist logic of the Anthropocene Cybernetic Capitalism shows how the cultural obsession with incommunicability that animates cybernetic rationalization has taken an irrationalist turn resurfacing in the mysticism of conspiracy theory and radical right politics The book offers a novel and compelling materialist interpretation of today s paradoxical connections between neoliberal rationalism and radical right irrationalism **Behind the Swap** Andrew DeJoy, 2022-05-10 Andrew DeJoy s *Behind the Swap* offers a middle office perspective on the risks and miscommunications in post trade processing and provides a framework and solutions for a better approach In August of 2020 Citibank made one of the worst mistakes in banking history it accidentally sent out almost 900 million of its own funds Many of the recipients didn t give back the money Citibank sued And a federal court ruled that the recipients could keep the funds Citibank s error is not surprising The underlying contributors that led to the mistaken payment permeate the global financial services industry Manual data entry decades old technological infrastructure inadequate training and systems that can t interact with one another are just a few of the problems that face post trade processing the machinery behind financial markets Unfortunately years of neglect by regulators and financial institutions themselves has left this infrastructure needlessly complex astoundingly inefficient frequently inaccurate and woefully inadequate for modern financial markets The problems are easy to see but difficult to admit For financial institutions the current system costs billions of dollars each year in labor systems maintenance and lost funds For regulators the current system precludes the ability to track systemic risk It also artificially inflates the stability of the global financial system For lawyers and prosecutors the current system allows ample opportunity for unlawful misconduct such as rogue trading and fraud Andrew DeJoy s *Behind the Swap* examines the risks involved in post trade processing in swaps and derivative markets and provides solutions to better control those risks While Andrew doesn t claim to have all the answers he does believe there is a better system that is both achievable and necessary
