He Runs, She Runs Deborah Jordan Brooks,2013-07-21 While there are far more women in public office today than in previous eras women are still vastly

underrepresented in this area relative to men. Conventional wisdom suggests that a key reason is because female candidates start out at a disadvantage with the public compared to male candidates and then face higher standards for their behavior and qualifications as they campaign. *He Runs She Runs* is the first comprehensive study of these dynamics and demonstrates that the conventional wisdom is wrong. With rich contextual background and a wealth of findings, Deborah Jordan Brooks examines whether various behaviors such as crying, acting tough, displays of anger, or knowledge gaffes by male and female political candidates are regarded differently by the public. Refuting the idea of double standards in campaigns, Brooks's overall analysis indicates that female candidates do not get penalized disproportionately for various behaviors nor do they face any double bind regarding femininity and toughness. Brooks also reveals that before campaigning begins, women do not start out at a disadvantage due to gender stereotypes. In fact, Brooks shows that people only make gendered assumptions about candidates who are new to politics, and those stereotypes benefit rather than hurt women candidates. Proving that it is no more challenging for female political candidates today to win over the public than it is for their male counterparts, *He Runs She Runs* makes clear that we need to look beyond public attitudes to understand why more women are not in office.

Role of Leaders in Managing Higher Education Enakshi Sengupta, Patrick Blessinger, 2022-12-05. *Role of Leaders in Managing Higher Education* highlights the importance of leaders in educational institutions. Showcasing a richly diverse authorship, the collection discusses the autonomy of faculty members based on bonds created through ethics, the style of leadership, and the concept of democracy and social justice.

The Psychology of Women at Work: Obstacles and the identity juggle Michele Antoinette Paludi, 2008. According to the U.S. Department of Labor, women made up 46.4 percent of the civilian labor force in 2005, and that percentage is expected to reach 47 percent by 2014. Professional and health-related occupations are the fastest growing roles for women, with computer-related, environmental, and educational fields also drawing increasingly on the female workforce. The bottom line at a macro level is that more and more women are driving the country's economic development. But with that phenomenon come questions, challenges, and concerns on many diverse levels. Debates rage on psychological topics such as the effect the increasing number of women at work has on marriage and divorce, family, and children; women's identities and stress levels; and overall their physical and mental health. Psychologist Michele A. Paludi and her team of experts from across fields examine all aspects of women at work: the pros and cons, how it is changing American society, its women, their relationships, partners, and children.
