Light from the East Alexei V. Nesteruk, In this unique volume a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition Alexei Nesteruk reveals how the Orthodox tradition deeply rooted in Greek Patristic thought can contribute importantly in a way that the usual Western sources do not Orthodox thought he holds profoundly and helpfully relates the experience of God to our knowledge of the world His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion From this Nesteruk derives Orthodoxy s unique approach to theological and scientific attribution Theology identifies the underlying principles logoi in scientific affirmations Nesteruk then applies this methodology to key issues in cosmology the presence of the divine in creation the theological meaning of models of creation the problem of time and the validity of the anthropic principle especially as it relates to the emergence of humans and the Incarnation Nesteruk s unique synthesis is not a valorization of Eastern Orthodox thought so much as an
