The Unnatural History Of The Sea:

The Unnatural History of the Sea Callum Roberts, 2007-07-14 Humanity can make short work of the oceans creatures In 1741 hungry explorers discovered herds of Steller's sea cow in the Bering Strait and in less than thirty years the amiable beast had been harpooned into extinction It's a classic story but a key fact is often omitted Bering Island was the last redoubt of a species that had been decimated by hunting and habitat loss years before the explorers set sail As Callum M Roberts reveals in The Unnatural History of the Sea the oceans bounty didn't disappear overnight While today's fishing industry is ruthlessly efficient intense exploitation began not in the modern era or even with the dawn of industrialization but in the eleventh century in medieval Europe Roberts explores this long and colorful history of commercial fishing taking readers around the world and through the centuries to witness the transformation of the seas Drawing on firsthand accounts of early explorers pirates merchants fishers and travelers the book recreates the oceans of the past waters teeming with whales sea lions sea otters turtles and giant fish The abundance of marine life described by fifteenth century seafarers is almost unimaginable today but Roberts both brings it alive and artfully traces its depletion Collapsing fisheries he shows are simply the latest chapter in a long history of unfettered commercialization of the seas The story does not end with an empty ocean Instead Roberts describes how we might restore the splendor and prosperity of the seas through smarter management of our resources and some simple restraint From the coasts of Florida to New Zealand marine reserves have fostered spectacular recovery of plants and animals to levels not seen in a century They prove that history need not repeat itself we can leave the oceans richer than we found them

The High Seas Olive Heffernan, 2024-05-21 In this essential guide to the half of our blue planet we call the high seas Will McCallum author of *How to Give Up Plastic* one of the world's leading voices on the issue tracks the race to exploit and protect our last frontier Two thirds of the world's oceans lie beyond national borders Owned by all nations and no nation simultaneously the high seas are home to some of the richest and most biodiverse environments on the planet But they are also home to exploitation on a scale that few of us have imagined Here out of sight and out of mind industry and economic progress rule and lax enforcement and apathy are the status quo underscored by a battle to control profit from protect or obliterate the world's largest wildest commons In this book Heffernan uncovers the truth behind deeply exploitative fishing practices investigates the potentially devastating impact of deep sea mining and holds to task the Silicon Valley interventionists whose solutions to climate change are often wildly optimistic radically irresponsible or both This is a powerful and deeply researched manifesto calling for the protection and preservation of this final frontier Published in Partnership with the David Suzuki Institute

Animal Industries Taina Syrjämaa, Marja Jalava, Taija Kaarlenkaski, Otto Latva, Eeva Nikkilä, Tuomas Räsänen, 2024-04-01 This book examines an extremely topical phenomenon the massive industrial exploitation of animals from a previously neglected perspective It

explores the history and development of animal industries in Nordic countries from their establishment in the late nineteenth century to the present day These countries are often considered to be progressive and advanced in animal protection but consumption practices in this area are actually excessive in relation to planetary resources and are among the most unsustainable on a global scale If we want to understand current problems it is essential to be aware of long term changes and continuities as well as the diversity of animals that have been exploited The purpose of this book is to explain these changes and provide new knowledge for scholars in human animal studies decisionmakers and the general public

Fagan,2017-01-01 Before prehistoric humans began to cultivate grain they had three main methods of acquiring food hunting gathering and fishing Hunting and gathering are no longer economically important having been replaced by their domesticated equivalents ranching and farming But fishing humanity s last major source of food from the wild has grown into a worldwide industry on which we have never been more dependent In this history of fishing not as sport but as sustenance archaeologist and writer Brian Fagan argues that fishing rivaled agriculture in its importance to civilization He tours archaeological sites worldwide to show how fishing fed the development of cities empires and ultimately the modern world Jacket flaps **The Nature Conservancy Magazine** ,2008 *Issues in Science and Technology* ,2007 **The Publishers Weekly** ,1897 *Nature Conservancy* ,2008 The Nation ,1909 Smithsonian Ocean Deborah Cramer,2008-10-07 The tide has turned and people now hold Earth s life giving waters in their hands In this visually stunning book a gifted science writer often compared to Rachel Carson explains why people s lives more than ever depend on the sea 300 photographs **Ecosystem Management and Sustainability** Robin Kundis Craig,John Copeland Nagle,Bruce Pardy,Oswald J.
