The Untied States Of America Polarization Fracturing And Our Future:

The Untied States of America Juan Enriquez, 2007-12-18 Can a country be like a marriage that has run out of cash and steam resulting in the inevitable frank discussions about just who is pulling his or her own weight Eventually even those who love each other sometimes conclude they cannot stay together Juan Enriquez's unique insights into the financial political and cultural issues we face will provoke shock and surprise and lead you to ask the question no one has yet put on the table Could becoming untied ever happen here It's a question made especially relevant when we are faced with such unpromising facts as At no other time have we had the unwelcome convergence in which the three key sectors of business government and consumers are so tapped out due to debt that each lacks the financial wherewithal to come to the rescue of the others Most assets are not being used for productive purposes but for speculation resulting in people lacking incentives to create real wealth focusing instead on buying selling and flipping real estate As religion starts to mix with politics we have a culture that allows us to fall behind what were previously third world nations because we are now treating science the way we did sex in the 1950s banning or burying evolution theories and research into promising lifesaving areas such as stem cell research When the enemy was outside for example the threat perceived when the Soviet Union launched Sputnik and people feared America would lose the brain race we rallied Now the enemy is within and we polarize Defaming the legitimacy of people on the other side becomes the currency of the day where people in blue states are seen as godless liberal elitists and those in red states are seen as well rednecks Citizenship Enriquez says is like buying into a national brand If the brand promises one thing and delivers another could it then have the same fate as a tired product on a supermarket shelf eroding losing support even disappearing Countries even one as powerful and successful as America live on fault lines When a fault line splits it's near impossible to put things back together again What America will look like in fifty years depends on what we do today to act on the issues raised in *The Untied States of America* Also available as an eBook *The New American Story* Bill Bradley, 2007-03-27 Politics is stuck writes Bill Bradley in this insightful informative and provocative book about America at a crossroads but idealism isn't dead It can be reawakened What will it take to make America a better stronger truer country asks the bestselling author former Knicks star and onetime presidential candidate Bill Bradley believes that America is at a teachable moment when we are compelled to reevaluate our political system our leadership our agenda as a nation and ourselves as citizens With clarity and urgency Bradley shows why the story we are being told now about who we are as a people is not true He then offers a new story about our nation based on America's rich heritage and his belief in the character of the American people Bradley explores what changes need to be made in our parties in our politics and in citizen activism to ensure America's future He asserts that the American people are ready for the truth and suggests that the party that chooses to embrace this new story will be in power for a generation Writing from his own experience in politics and drawing on his knowledge of history Bradley shows how the Republican Party has built a solid pyramid structure since the

1970s at the base of which are money ideas and media whereas the Democratic Party's structure is an inverted pyramid with too much emphasis put on the need for a charismatic leader to hold the pyramid up. Each party for different reasons fails to deal with the real issues that now confront America. This informed and inspiring call to action is addressed not only to the parties and elected leaders but to citizens as well. Bradley proposes things every American can do to shape our nation's future. He points out that if eighty percent of the electorate voted instead of fifty percent it would be the most important change in American politics since women got the vote. Now more than ever he says we need to embrace an ethic of connectedness, a combination of collective action and individual responsibility to solve our nation's most pressing problems and he argues that the fate of all countries is bound together as never before. Writing today with the freedom of a private citizen, Bradley provides this transformative and eye-opening book about the danger and the promise of America's choice at this crucial moment in the nation's history.

The Untied States of America Juan Enriquez, 2005 Through a compelling synthesis of factoids illustrated with mind-bending stories, ideas, photographs, and maps, the author conducts a provocative conversation about the future shape of America.

The United States of America Juan Enriquez, 2005 Can a country be like a marriage that has run out of cash and steam? Eventually, even those who love each other sometimes conclude they cannot stay together. Enriquez's insights into the financial, political, and cultural issues we face will lead you to the question no one has yet put on the table: Could becoming untied ever happen here? When the enemy was outside, for example, when the Soviet Union launched Sputnik and people feared America would lose the brain race, we rallied. Now the enemy is within and we polarize. Defaming the legitimacy of people on the other side becomes the currency of the day where people in blue states are seen as godless liberal elitists and those in red states are seen as well rednecks. Countries, even one as powerful and successful as America, live on fault lines. When a fault line splits it, it's near impossible to put things back together again.

From publisher description: **The Second World** Parag Khanna, 2009-02-10 In *The Second World*, scholar Parag Khanna, chosen as one of Esquire's 75 Most Influential People of the Twenty-First Century, reveals how America's future depends on its ability to compete with the European Union and China to forge relationships with the Second World, the pivotal regions of Eastern Europe, Central Asia, South America, the Middle East, and East Asia that are growing in influence and economic strength. Informed, witty, and armed with a traveler's intuition for blending into diverse cultures, Khanna depicts second-world societies from the inside out, observing how globalization divides them into winners and losers and shows how China, Europe, and America use their unique imperial gravities to pull the second-world countries into their orbits. Along the way, Khanna explains how Arabism and Islamism compete for the Arab soul, reveals how Iran and Saudi Arabia play the superpowers against one another, unmasks Singapore's inspirational role in East Asia, and psychoanalyzes the second-world leaders whose decisions are reshaping the balance of power.
