Crash Course in Gaming Suellen S. Adams, 2013-11-25 Video games aren't just for kids anymore. This book will describe the why and how to start or expand a video gaming program in the library, including some specific examples of how to target adult and female gamer patrons. Gaming supplies more than just visual stimulation and empty entertainment; it can also promote socialization as well as the learning of both traditional and new literacies required to succeed in the modern world. Problem-solving, multi-tasking, complex decision-making on the fly, and reading the combination of words and graphics are vital skills for the 21st century, all of which are required to play video games. *Crash Course in Gaming* discusses the pros and cons of gaming, the types of games and game systems, circulating collections, and game programs. It explains how a library's video game program can and should do much more than simply draw younger users to the library, providing examples of how everyone from parents to senior citizens can benefit from a patron-oriented computer gaming program. The appendices also include specific games programs, review sources, and sources for further information.

Critical Internet Literacies Jamie Cohen, 2024-12-30 An introductory critical internet studies text that builds upon media literacy and digital culture theory to offer a thorough examination of the intersection of online technology and culture. We are now collectively at a hinge point in the evolution of the web where online influencers can sway national discourse, geopolitical events are remixed through memes, and online harms are misunderstood. This book argues that people are generally aware that online media has repercussions in off-platform spaces but sometimes lack the language to properly critique online trends, memes, and internet-born media. How are citizens, activists, and marginalized groups able to use these tools effectively and safely in these times? Jamie Cohen explores aspects of internet culture in an approachable manner, building upon critical media literacy and applying a critical technocultural analysis as a methodology to reimagine how media literacy can operate in an online media environment. The book explores key topics such as accessibility, the creator economy, content moderation, tech bias, platform capitalism, internet culture, and safety. Offering a new way of reading internet media and critiquing content and creators, this book is essential reading for students and scholars of digital culture, internet culture, media literacy, social media, and beyond.
