Linguistic Perspectives on English Grammar Martin

J. Endley, 2010-12-01 The proposed book is best described as a linguistically oriented textbook taking the grammar of English as its subject matter. It is directed to professional teachers of English ESL and EFL and their students as well as those currently training to become teachers of English. The book is also likely to be of interest to interpreters, translators and other English language professionals. It will explore selected aspects and problem areas of English from a broadly functional linguistic perspective. My experience as a teacher and teacher trainer has shown me that this perspective has the potential to inspire teachers and students with a genuine enthusiasm for the grammatical features of English and that it often enables them to make sense of the grammar in a way that all too often other approaches signally fail to do. An important focus of the book is on understanding grammar as a series of conventionalized patterns rather than a set of rules, which is how grammar has traditionally been presented. Moreover, unlike many other grammar books, this book emphasizes how the grammatical constructions under consideration are employed in various types of communicative situation, attention being given to the importance of discourse context in interpreting the target forms. In line with contemporary linguists, generally the approach adopted is descriptive rather than prescriptive. While the main focus is on English, I offer occasional comments on how the issue under discussion is expressed in languages other than English. Apart from the inherent interest which I hope such comparisons may have for the reader, I take the view that these can be helpful in casting further light on the grammar of English.

Non-Finiteness Bingjun Yang, 2022-04-28 As a gateway to central questions in linguistics, non-finiteness is unavoidable in both typological studies and aspects of natural language processing such as text segmentation and annotation. This study presents a process relation framework to explain the more complex previously unaccounted for instances of non-finiteness in clause structure.

A grammar of Kagayanen Carol J. Pebley, Thomas E. Payne, 2024-07-05 Kagayanen is a resilient Austronesian Greater Central Philippine Manobo language spoken by about 30 000 individuals mostly in Palawan province in the Philippines. This grammar is the result of nearly 40 years of research by Carol Pebley and a team of Kagayanen speakers and non-Kagayanen co-workers. The primary data source is a corpus of texts collected over a 20-year period. These texts, three of which appear in an appendix to this book, provide vivid insights into Kagayanen ways of being. The grammar is written with a general linguistics audience in mind from a communication-first perspective. It should prove useful to specialists in Austronesian languages, linguistic typologists and others interested in doing research in the central Philippines. It is also hoped that this grammar will be an encouragement to Kagayanen speakers, proving that their language is wonderfully complex and deserves an equal place alongside other regional and international languages.

The Structure of Modern English Laurel J. Brinton, 2000 This text is designed for undergraduate and graduate students interested in contemporary English, especially those whose primary area of interest is English as a second language. Focus is placed exclusively on English data, providing an empirical explication of the structure of the language.
