relationships and community **Nature and Nurture in Personality and Psychopathology** Joel Paris, 2022-02-17

Psychiatry and clinical psychology have long been divided about the roles of nature and nurture in the pathways to psychopathology. Some clinicians offer treatment almost entirely based on neuroscience. Some psychologists offer psychotherapies almost entirely based on the impact of environmental stressors. Paris argues for a balanced middle ground between nature and nurture in human development. This book reviews and integrates research showing that the key to understanding the development of mental disorders lies in interactions between genes and environment. It explores why personality is a key determinant of how people respond to stress, functioning as a kind of psychological immune system. This model represents a shift from overly simple and reductionistic constructs based primarily on biological risks or on psychosocial risks in development. Instead, it offers a complex and multivariate approach that encourages a broader approach to treatment. This book is essential for all mental health clinicians who are interested in understanding the roles of nature and nurture in the development of psychopathology.

Post-Punk Perception Edmund Wong, 2013-07

Growing up in Singapore in the 80s has been challenging. I didn't know much about life or economy. I didn't know what I wanted to do apart from playing. I know I had to study and get a job. In school, we had to write composition about our profession when we grow up. I had never wanted to be a philosopher, let alone writing about social philosophy. It is just that growing up with a single parent is tough. It is tougher when she is uneducated and I had to learn most things by myself. After my National Service, I decided to further studies. That was when I was exposed to philosophy and psychology in the UK. After graduation in 1999 with a degree in Electronics, I came back home to resume my National Service. I disrupted it and had about 2 months left. The life in UK exposed me to something that I did not notice when growing up in Singapore. I find the local social scene unsatisfactory. They are Confucians, Muslims, Christians, freethinkers, and humanists. Most of the time they are preoccupied with how to earn more money. Religion does not give me the fulfillment that it promised. In addition, most were based on Singaporeans' interpretation of the Bible and Buddhism's dharma. Most times I feel that everything that Singaporeans do has got to do with wealth creation or at least with the expenditure of it. It ends up like what Pope Francis referred to as the cult of money. Organised religion involves more fear mongering than cultivating an inner grace and peace. Hence, this book is about how I relate an ancient thinker's ethics, Aristotle, to the present day. I find Aristotle's ethics to most suit my needs as a man and lover. It does not pretend to be more than what it seeks: the golden mean. It does require us to think and explore the values to find balance and achieve wisdom with intellectual and moral virtues. I also find other philosophers, French or not, particularly insightful and thought provoking. They offer me explanation and exploration on subjects like love, sex, and death. Freudian psychoanalysis are also very penetrating in their findings and insights. Moreover, I needed some contemporary psychological theory, not in-depth psychoanalysis, to back Aristotle's model of ethics, intellectual and moral virtues. Hence, the psychological background of my book. I got acquainted with these psychological theories when I was preparing myself to be a financial

consultant I later found out more about them and they became useful in my work and life Hence I would like to share it with people in Asia so that they can ask the right kind of questions in life in order to learn more about themselves and the social milieu they are living in Because everyone of us are affected by the social sciences politics economics and sociology This book will I hope allow us to understand why we are irrational and how we can make rational changes through reasonings in their life and achieving eudaimonia My wish is simply to share what I enjoy doing apart from creating useful ideas to improve the world Through my book I hope to make others understand religion science and philosophy and how they play an increasingly integral part in the Asian century
