Theories of Human Development Barbara M. Newman, Philip R. Newman, 2010-10-18 Intended for courses on theories of human development this new text presents nine theories grouped into three major families those that emphasize biological systems those that emphasize environmental factors and those that emphasize a dynamic interaction between biological and environmental forces The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights The inclusion of social role theory and life course theory expand the book's relevance to the study of adulthood and aging Grouping the theories by families enhances students ability to think critically about theoretical ideas assess the strengths and weaknesses of each theory and gain a deeper understanding of how each theory guides research and application The three families are introduced with a brief overview of the unique perspectives of each theory and the rationale for grouping these theories together Discussion of each theory includes the historical and cultural context in which the theory was developed an overview of key concepts and important ideas new directions in contemporary scientific work a research example illustrating how the theory has been tested and modified an application showing how the theory has guided the design of an intervention or program an analysis of how the theory answers basic questions about human development and a critique highlighting the theories strengths and weaknesses Theories of Human Development serves as a text in advanced undergraduate and or beginning graduate courses in theories of human development Its clear organization and engaging writing style make it accessible to students with a minimal background in human development

Understanding Human Development Ursula M. Staudinger, Ulman E.R. Lindenberger, 2012-12-06 K Warner Schaie I am pleased to write a foreword for this interesting volume particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague mentor or research collaborator The editors begin their introduction by asking why one would want to read yet another book on human development They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development This volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure This approach does not surprise After all the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin whether as students junior scientists or senior visitors That institute under the leadership of Paul Baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality Over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context

Human Development and Faith (Second Edition) Felicity B. Kelcourse, 2015-07-28 This book now in its second edition brings together the best available understandings of human development from a multidisciplinary perspective Uniquely inclusive of the moral and faith dimensions of context and life cycle development Human Development and Faith examines the interplay of mind body family community and soul at every stage of development It addresses two central questions What are the good enough conditions of parenting family and community in each phase of life from birth to death which support growth and development What gives life adequate meaning as development proceeds If human development describes the normative and hoped for passages of life then faith provides the necessary component of meaning Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live The Journal of Pastoral Theology called the first edition of Human Development and Faith an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development This second edition includes a new chapter on infancy updates reflecting our growing awareness of cultural diversity and a new preface

C.D.P. Lyra, Jaan Valsiner, 2014-02-04 One of the most profound insights of the dynamic systems perspective is that new structures resulting from the developmental process do not need to be planned in advance nor is it necessary to have these structures represented in genetic or neurological templates prior to their emergence Rather new structures can emerge as components of the individual and the environment self organize that is as they mutually constrain each other s actions new patterns and structures may arise This theoretical possibility brings into developmental theory the important concept of indeterminism the possibility that developmental outcomes may not be predictable in any simple linear causal way from their antecedents This is the first book to take a critical and serious look at the role of indeterminism in psychological and behavioral development What is the source of this indeterminism What is its role in developmental change Is it merely the result of incomplete observational data or error in measurement It reviews the concepts of indeterminism and determinism in their historical philosophical and theoretical perspectives particularly in relation to dynamic systems thinking and applies these general ideas to systems of nonverbal communication Stressing the indeterminacy inherent to symbols and meaning making in social systems several chapters address the issue of indeterminism from metaphorical modeling and narrative perspectives Others discuss those indeterministic processes within the individual related to emotional social and cognitive development **The SAGE Encyclopedia of Lifespan Human Development** Dr Marc Bornstein, Marc H.
