rituals pilgrimage water as a cultural material and place making hydro systems modern practices environmental considerations the contribution of water to transforming secular into sacred and future digital cyber context of water and sacredness All chapters are based on original archival studies historical documents and field visits to the sites and buildings These examinations show water as an expression of architectural design its materiality and its spiritual values The book will be of interest to architects historians environmentalists archaeologists religious scholars and preservationists **Greening Spaces for Worship and Ministry** Mark A.
