Universal Design Guidelines Sally Swanson,2023-11-07 This Manual serves as a basis to concisely present the most common UD principles and offers simple straightforward examples that were developed for colleges and universities but adapt well to any sector or project Importantly as Sally intended the Manual is not an Access Compliance Manual While much has been written about UD and it is often equated with Access Compliance the two concepts are quite different The purpose of accessibility laws is to eliminate barriers in the built environment for use by people with disabilities UD on the other hand starts from a much broader perspective and seeks to provide improved usability and safety for all members of the global community The goal of UD is to extend the benefits of accessible design to everyone and recognize that improved usability enhances the value of the built environment for all of us UD principles give direction rather than correction
