Verborgen Steden Stadsarcheologie In Nederland:

Verborgen steden, 1990 **Huisplattegronden in Nederland** A.G. Lange, 2014-04-30 In de Nederlandse bodem zijn de resten van oudtijds bewoning zelden als opgaande structuren terug te vinden De enige archeologisch herkenbare sporen zijn meestal uitsluitend verkleuringen van de grond die laten zien waar de palen en de wanden van het huis hebben gestaan Zij laten zo een afhankelijk van de omstandigheden meer of minder herkenbare plattegrond in de bodem achter Huisplattegronden komen vaak in opgravingen in Nederland te voorschijn en behoren daarmee tot een van de meest onderzochte en meest intrigerende archeologische fenomenen In dit boek schetsen archeologen de ontwikkeling van de huizenbouw vanaf de komst van de eerste boeren zo'n 7000 jaar geleden op de lss in Zuid Limburg tot aan de dertiende eeuw in alle regio's met een uitstapje naar de huizenbouw in de Nieuwe Tijd Het laat ook de lacunes van onze kennis zien op dit gebied en schetst de methodieken die wij willen gebruiken om het onderzoek verder te helpen Huisplattegronden in Nederland is daarom in de eerste plaats een handboek voor archeologen Maar ook studenten en liefhebbers van het archeologisch onderzoek zullen veel nieuwe kennis kunnen opdoen over de verschillende verschijningsvormen van gebouwen We hopen dat ze worden gegrepen door deze bijzondere groep van archeologische gegevens en worden uitgedaagd mee te denken om de talloze vragen die nog resten te helpen onderzoeken **Medieval Towns** John Schofield, A. G.

Vince, 2003-01-01 Though the book is primarily about medieval towns in Britain many parallels are drawn with contemporary towns and cities all over Europe from Ireland to Russia and from Scandinavia to Italy It is written in the belief that medieval urban archaeology should be a Europe wide study as are the fields of architecture and urban history BOOK JACKET

Stadswording in de Nederlanden Reinout Rutte, Hildo Engen, 2008 Dit boek gaat over de wording van steden in de Nederlanden gedurende de Middeleeuwen Bijna alle steden die wij tegenwoordig kennen zijn tussen de elfde en vijftiende eeuw ontstaan Dankzij het vele werk dat is verzet in bijvoorbeeld de archeologie de historische geografie de geschiedwetenschap en de architectuurgeschiedenis is de kennis van het stadswordingsproces de afgelopen decennia flink toegenomen Door het overwegend specialistische karakter van het recente onderzoek is een overzichtelijke kijk op de Nederlandse stedengeschiedenis echter ver te zoeken In dit boek wordt voor het eerst een handzaam overzicht gegeven Een keur aan specialisten uit de verschillende disciplines behandelt op toegankelijke wijze thema's zoals de stad in het landschap de interpretatie van archeologische vondsten de morfologie van de stad en de verlening van stadsrechten Bovendien wil dit boek duidelijk maken wat de diverse disciplines die zich bezighouden met de geschiedenis van de stad aan elkaar kunnen hebben en zo een stimulans zijn voor verder synthetiserend onderzoek naar de wordingsgeschiedenis van steden in de Nederlanden **International Handbook of Historical Archaeology** Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those

involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today
