

VECTRA

SECTION 7 PLUMBING SYSTEMS

FRESH WATER SYSTEM

Fresh Water Tank..... 70 gal.

The fresh water system provides water to the galley sink, shower, bathroom lavatory, toilet and water heater. Water may be supplied by either of two sources:

- a water tank located within the motor home,
- or
- any external water source to which the motor home may be connected, known as "city water".

Water Connection

FRESH WATER TANK FILLING PROCEDURES:

Always fill the fresh water tank at an approved potable water filling facility or a known purified drinking water source.

To Pressure Fill Water Tank from City Water Connection:

1. Attach a hose from a city water faucet to the city water connection in the water carrier on the left (driver's) side of your coach. If equipped with optional hose reel, simply pull out hose and attach to city water faucet. From the tank fill valve to the WATER

2. Tank is full when water begins to flow from the overflow vent tube beneath the coach.

NOTE: Because city water pressure varies from location to location, we recommend using an in-line water pressure regulator to prevent damage to any components, connections and seals in your fresh water system.

A water pressure regulator may be obtained from any well stocked RV dealership retail center and some retail discount centers. These devices simply connect in-line between the supply hose and the city water input on the coach.

We recommend a regulator that controls water pressure to 40 psi maximum.

NOTE: Always keep the tank fill valve closed unless you are filling the tank. If this valve is open while using the city water, the water will keep flowing into the tank and out the tank overflow tube.
