Winning The Future A 21st Century Contract With America:

Winning the Future Newt Gingrich, 2005-01-10 According to former House Speaker Newt Gingrich America currently faces five threats that could undermine if not eliminate the United States if immediate steps are not taken to correct them The threats as he sees them are Islamic terrorists and rogue dictatorships armed with nuclear or biological weapons the removal of God from American public life a loss of patriotism and sense of America s history a decline in economic supremacy because of poor science and math education and the increasing budgetary burden of Social Security and Medicare To tackle these problems Gingrich offers his 21st Century Contract with America which he outlines in great detail in this bold and thought provoking book His updated contract which comes a decade after the original Republican Contract with America that marked the high point of Gingrich s national power calls for a dramatically simplified tax code that favors savings and investment government investment in science and technology particularly regarding space energy and the environment transforming Social Security into personal savings accounts overhauling the civil justice system to reduce the burden of lawsuits and updating the federal government including the privatization of some functions so that it moves at the speed and effectiveness of the information age And that s just the beginning He also calls for tripling the size of America s intelligence community reforming its election system developing a more intelligent health care system that creates jobs and increases quality of life and balancing the federal budget Gingrich believes that this ambitious agenda can be accomplished but only if it receives grassroots support The entrenched political system with its lobbyists bloated bureaucracies and the complicity of the media is too self serving to fix itself he stresses Concise and clearly presented *Winning the Future* is long on specifics and short on rhetoric and it succeeds as a springboard for political discourse Gingrich s aim is clearly to inspire citizens to take responsibility for the country s direction by demanding more of their government and their leaders *Winning the Future*

Newt Gingrich, 2006-05-01 America s future in the twenty first century argues Newt Gingrich will be determined by the decisions we make now His book is a grass roots call to action and will set the debate for the new administration and Congress **Transforming Public Leadership for the 21st Century** Ricardo S. Morse, Terry F. Buss, C. Morgan Kinghorn, 2014-12-18 The forces of globalization are shifting our world including the public sector away from hierarchy and command and control toward one of collaboration and networks The way public leadership is thought about and practiced must be and is being transformed This volume in the Transformational Trends in Governance Democracy series explores what the shift looks like and also offers guidance on what it should look like Specifically the book focuses on the role of career leaders those in public service who are agents of change not only in their own organizations but also in their communities and policy domains These leaders work in network settings making connections and collaborating to create public value and advance the common good Featuring the insights of an authoritative group of contributors the volume offers a mix of scholarship from philosophical discussions to conceptual models to empirical studies that taken together will help
