Historical Dictionary of Women in Sub-Saharan Africa Kathleen Sheldon, 2016-03-04 African women's history is a vast topic that embraces a wide variety of societies in over 50 countries with different geographies social customs religions and historical situations Africa is a predominantly agricultural continent and a major factor in African agriculture is the central role of women as farmers It is

estimated that between 65 and 80 percent of African women are engaged in cultivating food for their families and in the past that percentage was likely even higher. Thus one common thread across much of the continent is women's daily work in their family plot. This second edition of *Historical Dictionary of Women in Sub-Saharan Africa* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on individual African women in history, politics, religion, and the arts; on important events, organizations, and publications; and on topics important to women in general: marriage, fertility, employment, and to African women in particular: market, women's child marriage, queen mothers. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Women in Africa.

African Indigenous Knowledge and the Disciplines Gloria Emeagwali, George J. Sefa Dei, 2014-11-26. This text explores the multidisciplinary context of African Indigenous Knowledge Systems from scholars and scholar activists committed to the interrogation, production, articulation, dissemination, and general development of endogenous and indigenous modes of intellectual activity and praxis. The work reinforces the demand for the decolonization of the academy and makes the case for a paradigmatic shift in content, subject matter, and curriculum in institutions in Africa and elsewhere, with a view to challenging and rejecting disinformation and intellectual servitude. Indigenous intellectual discourses related to diverse disciplines take center stage in this volume, with a focus on education, mathematics, medicine, chemistry, and engineering in their historical and contemporary context.

This volume constitutes an updated version of the bibliography published in 2004 by the African Mathematical Union. The African Studies Association attributed the original edition a special mention in the 2006 Conover Porter Award competition. The book contains over 1600 bibliographic entries. The appendices contain additional bibliographic information on: 1. mathematicians of the Diaspora; 2. publications by Africans on the history of mathematics outside Africa; 3. time reckoning and astronomy in African history and cultures; 4. string figures in Africa; 5. examples of books published by African mathematicians; 6. board games in Africa; 7. research inspired by geometric aspects of the sona tradition. The book concludes with several indices: subject, country, region, author, ethnographic, and linguistic. Journal mathematicians Professor Jan Persens of the University of the Western Cape, South Africa, and president of the African Mathematical Union, 2000-2004, wrote the preface.

African Pythagoras Paulus Gerdes, 2011. *AFRICAN PYTHAGORAS: A study in culture and mathematics education* shows how diverse African ornaments and artefacts may be used to create an attractive context for the discovery and the demonstration of the Pythagorean Theorem and of related ideas and propositions.
