Women And Cardiovascular Disease Addressing Disparities In Care:

Women And Cardiovascular Disease: Addressing Disparities In Care Kevin R Campbell, 2014-09-26 Cardiovascular disease is the number one killer of both men and women in the US and Europe today. Over the last 20 years many innovations in technology have allowed for improved therapies for heart attack and stroke and overall outcomes have significantly improved. Death rates from cardiovascular disease in men are declining. However, even with these improvements in care, death rates for women remain unchanged. This book will explore these gender disparities in care in depth. Specific sections will be devoted to answering the questions of why they are occurring and what healthcare providers and women can do to effect change and narrow the gender gap in cardiovascular care. Ultimately, this book is designed to open the eyes of healthcare providers, medical professionals, and policy makers, as well as potential female patients, and should serve as a call to action to promote better cardiovascular care for women. Through education, awareness, and advocacy, women worldwide will benefit. The gap will begin to close, and better cardiovascular care can be provided for all.

Losing Our Way In Healthcare: The Impact Of Reform Kevin R Campbell, 2015-09-07 Healthcare in the US is rapidly changing. The changes that are occurring as a result of the Affordable Care Act (ACA) or Obamacare will forever modify the way in which doctors and patients interact. This book is a collection of essays that initially are a heartfelt description of the author's passion for patient care and an exploration of the art of healing. These essays then go on to explore healthcare reform in the US and how the proposed and ongoing changes in the healthcare system are likely to impact the practice of medicine and ultimately affect the doctor-patient relationship. The essays explore ethical concerns and leave us wondering just how medicine will be practiced in the future.

Lifestyle Modification to Control Heart Disease Donald Shepard, 2010 Lifestyle Modification to Control Heart Disease: Evidence and Policy is a review and critical examination of the scientific literature on cardiovascular lifestyle modification. This book provides systematic critiques of prior published research in order to clarify some of the debate around addressing coronary heart disease through lifestyle modification. It fills gaps in current published systematic reviews, particularly with respect to the cost-effectiveness of lifestyle modification, gender, racial, and ethnic disparities in treatment of coronary heart disease, and multifactorial programs. It also explores existing research on disparities in coronary artery disease treatment and utilization and suggests potential solutions to address barriers at the system, provider, and patient level. By summarizing research findings in a reader-friendly format, it assists healthcare practitioners in working with patients more effectively, improves students' background knowledge to enhance preparation for clinical work, and sets a context for future researchers who want to continue to address key questions in this area.

Addressing Unmet Needs in Women's Health United States Congress, Senate, Committee on Health, Education, Labor, and Pensions, Subcommittee on Public Health, 2003 *Psychosocial Stress and Cardiovascular Disease in Women* Kristina Orth-Gomér, Neil Schneiderman, Viola Vaccarino, Hans-Christian

Deter, 2014-11-20 Not long ago it was assumed that coronary heart disease mainly or only affected men. Now that CHD is

recognized as a leading killer of women as well as men numerous research studies have been made of its diverse presentations in women causal factors and possibilities for prevention and treatment The expert contributions to Psychosocial Stress and Cardiovascular Disease in Women span the results of this cross disciplinary awareness This progressive resource takes a three dimensional approach to its subject focusing on epidemiology and risk factors for heart disease in women the psycho and neurobiology of stress and coronary disease and promising clinical interventions Chapters identify and analyze multiple intersections of social biological and psychological factors in affecting women s heart health from the social dimensions of depression to genetic environmental interactions to the demands of balancing work and family These wide ranging findings will assist and motivate professionals in choosing and creating interventions developing appropriate prevention strategies and reducing gender based disparities in health care Among the topics covered Enhancing women s heart health a global perspective Coronary heart disease in women evolution of our knowledge Gender observations on basic physiological stress mechanisms in men and women Sleep as a means of recovery and restitution in women LifeSkills training benefiting both genders for different reasons Gender considerations in psychosocial behavioral interventions for coronary heart disease In particular this book will be helpful for cardiologists and other clinicians who may ask themselves why patients do not seem to make rational choices Why do patients not follow the advice they are offered is a common complaint The role of psychosocial stress for patient compliance and adherence can be traced throughout the volume It is emphasized in the chapters on psychosocial interventions along with other tangible and conceptual suggestions and experiences with psychosocial stress and life style change Psychosocial Stress and Cardiovascular Disease in Women offers a deep practical level of understanding of this epidemic to help expand the work of health and clinical psychologists sociologists cardiologists primary care physicians and epidemiologists
