Women And Farming Property And Power:

Women and Farming S. Shortall, 1999-06-30 Arguing that property and power are central to understanding the position of women in farming and using comparative examples this book considers the transfer of land between men the changed role of women in the dairy industry in the nineteenth century women in farming organisations women in agricultural education programmes and the role of the state in shaping the lives of farm women The common themes of power and property underpin all the chapters

Women and Farming Sally Shortall, 1999 This text argues that property and power are central to understanding the position of women in farming Using comparative examples different chapters consider the transfer of land between men and the changed role of women in the dairy industry in the 19th century women in farming organizations women in agricultural education programmes and the role of the state in shaping the lives of farm women The common themes of power and property underpin all the chapters

More Than a Farmer's Wife Amy Mattson Lauters, 2009 Examining how women were presented in farming and mainstream magazines over fifty years and interviewing more than 180 women who lived on farms Lauters reveals that rather than being victims of patriarchy most farm women were astute businesswomen working as partners with their husbands and fundamental to the farming industry Provided by publisher

Feminisms and Ruralities Barbara Pini, Berit Brandth, Jo Little, 2014-12-18 Feminist concern with difference has rarely extended to rurality even if it is now widely recognized that experiences of inequality depend on intersections of several identities in each individual life This lack of concern may reflect the urban background of the majority of feminist academics or at least their urban positionality once in the academy It may equivalently be that feminists have been influenced by stereotypes of rural women as traditional and reactionary and thus seen them as unlikely exponents of gender equality and an unfruitful focus for scholarly energies Perhaps the problem is a broader one that is reflective of the much documented but still apparent unwillingness of many feminists to recognize and address difference in any of its manifestations Regardless even with the recent interest in intersectionality which has necessarily renewed and reenergized debates in feminism about diversity and inclusion the question of how women are differently positioned because of their non metropolitan location has remained largely overlooked

Rural Women in Leadership Lori Ann McVay, 2013-09-18 Rural women and leadership have in recent years come to be the focus of development initiatives in many countries To date however much of the writing on this topic has focused heavily on obstacles rather than facilitative factors in women's attainment of leadership positions Citing examples from a case study in Northern Ireland this book gives voice to the many vital positive elements in rural women's leadership development

Women in Agriculture Worldwide Amber Fletcher, Wendee Kubik, 2016-07-01 Over the past two decades existing documentation of women in the agricultural sector has surveyed topics such as agricultural restructuring and land reform international trade agreements and food trade land ownership and rural development and rural feminisms Many studies have focused on either the high income countries of the global North or the low income

countries of the global South This separation suggests that the North has little to learn from the South or that there is little shared commonality across the global dividing line Fletcher and Kubik cross this political economic and ideological division by drawing together authors from 5 continents They discuss the situation for women in agriculture in 13 countries worldwide with two chapters that cover international contexts The authors blur the boundaries between academic and organizational authors and their contributors include university based researchers gender experts development consultants and staff of agricultural research centers and international organizations i e Oxfam the United Nations World Food Program The common thread connecting these diverse authors is an emphasis on practical and concrete solutions to address the challenges such as lack of access to resources and infrastructure lack of household decision making power and gender biases in policymaking and leadership still faced by women in agriculture around the world Ongoing issues in climate change will exacerbate many of these issues and several chapters also address environment and sustainability This book is of great interest to readers in the areas of gender studies agriculture policy studies environmental studies development and international studies

Masculinities and Management in Agricultural Organizations Worldwide Barbara Pini, 2017-11-30 Using contemporary gender theory to examine gender and rurality beyond that of simply women femininities this illuminating book accurately locates the subject of masculinities within the rural agricultural context While there has been a wealth of literature on men and masculinities published in recent years the climate of ideas has been typically experienced through an urban lens This book therefore investigates new conceptual territory Embedded in the literature on gender and rurality as well as the scholarship on gender and organizations management the book draws on an in depth ethnographic study of gender relations in Australian agricultural politics It will speak to academic audiences in rural social sciences gender studies and management organization studies

A Living Countryside? Tony Varley, 2016-03-23 By examining a range of experiences from both the north and south of Ireland this book asks what the ideal of sustainable development might mean to specific rural groups and how sustainable development goals have been pursued across the policy spectrum It assesses the extent of commitment to a living countryside in Ireland and compares various opportunities and obstacles to the actual achievement of sustainable rural development How different sectors of rural society will be challenged in terms of future survival provides an overarching theme throughout

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike
