Surgical Technique of the Abdominal Organ Procurement

Andrzej Baranski,2009-03-01 The intention of this book is to promote a surgical technique of abdominal organ procurement in order to avoid organ damage and thus enhance the quality of retrieved organs Organ procurement from a brain death donor is an essential part of organ transplantation In donors where more than one organ is removed the surgical procedure is critically important and could be challenging both for the procurement and recipient surgeons Surgical injury or inadequate preservation of organs at this stage may cause irreversible organ damage or can lead to serious complications in the recipient Nowadays local or regional surgical teams whereby the transplant surgeon is not always one of the team members perform most multiorgan donor MOD procurement procedures To trust each other and to avoid surgical mistakes a quite training and standardization of the surgical techniques is required Teaching and training future procurement surgeons to adopt a standard operating procedure could be the right way to prevent technical mistakes and damage during abdominal multiorgan procurement I hope that in the near future every transplant surgeon involved in organ procurement will have to be certified The different national and international transplant organizations in Europe have been already started to establish the teaching programs which will lead to high expertise in the field of abdominal organ procurement

Academic Global Surgery Mamta Swaroop, Sanjay Krishnaswami, 2015-12-17 This seventh book in the series of Success in Academic Surgery look to sustain the field and facilitate the next generation of leaders in Academic Global Surgery It brings together a catalogue of current knowledge needs and pathways to a career in the field Academic Global Surgery involves educational research and clinical collaborations between academic humanitarian surgeons in high income countries HIC their low and middle income country LMIC partners and their respective academic institutions The goal of these collaborations is improving understanding of surgical disease and increasing access to and capacity for surgical care in resource poor regions In the last few years the rapid exchange of ideas through social media and

other technologies has combined with an increasing appreciation of worldwide health disparities to put the issue of global health at the forefront of our consciousness. Although traditionally neglected within public health initiatives, surgical disease is now recognized as a major contributor to death and disability worldwide while surgical therapy in resource poor areas is increasingly being shown to be cost effective. In response to this growing recognition, what began as mission trips and short term clinical volunteerism in the developing world has evolved into a burgeoning new field with a broader scope. While the tremendous recent interest from medical students and residents in Global Surgery has stimulated an exponential growth of interest in this field, current surgical literature has highlighted the need for further development and delineation of this new discipline within academic surgery.
