Issues in Materials Development Maryam Azarnoosh, Mitra Zeraatpishe, Akram Faravani, Hamid Reza Kargozari, 2016-03-22 *Issues in Materials Development* provides readers with theoretical foundations and practical aspects of designing materials for EFL ESL contexts. It starts with discussing some basic and preliminary principles of materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs adopting selection and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills: pronunciation, ESP vocabulary, and computer-assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners in addition to features of materials design at a universal level are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.

Narratives from the Classroom: An Introduction to Teaching introduces the reader to many of the important classroom issues surrounding the field of teaching. This book is unique in that it is a collection of personal accounts and ideas written by the teachers and teacher educators who lived those experiences. Because this is an introduction to teaching, each chapter addresses a different topic ranging from the purpose of schools and teachers' issues about policies and programs in the school and various practices found within the classroom walls. There is also a section that addresses preparation for the job market and what the first year of teaching is like. This book deliberately avoids being prescriptive and encourages the reader to form his or her own conclusions about the presented issues.
