Viral Infections Of Humans Epidemiology And Control:

Viral Infections of Humans Alfred S. Evans, Richard A. Kaslow, 1997-06-30 This latest edition of the classic text includes new and greatly revised chapters on laboratory methods in epidemiology human herpesvirus types 6 and 7 parvovirus and retroviruses The book covers the principles and approaches to the study of viral infections in human populations major virus classes of medical and public health importance and neoplastic and other slowly developing diseases due to viral infection

Viral Infections of Humans Richard A. Kaslow, Lawrence R. Stanberry, James W. Le Duc, 2014-09-27 Striking changes have occurred in the world since the publication of the last edition of *Viral Infections of Humans* The global population is rapidly approaching 8 billion climate change is leading to the introduction of new hosts vectors and virus diseases heretofore never seen in many parts of the world technological advances have revolutionized the ability to recognize and characterize viruses new and old vaccines are altering the epidemiological landscape of the diseases they target in some cases raising the hope of their eradication and remarkably powerful computational tools are enabling not only detection of outbreaks of disease much sooner than in the past but also through complex mathematical modeling more accurate prediction of their potential impact The new Fifth Edition of *Viral Infections of Humans* captures the both the excitement and frustration of the dynamic struggle between humankind and the viruses that continue to cause immense suffering It presents the latest concepts methods and technologies in epidemiology detection investigation modeling and intervention Updated and entirely new chapters by dozens of experts across the field provide analytic summaries of current knowledge of viruses and prions causing acute syndromes chronic illnesses and or malignancies In sum this ambitiously expanded volume offers a uniquely comprehensive perspective on viruses in humans from agents of classic diseases e g hepatitis measles polio rabies and yellow fever to those with greatest pandemic impact e g influenza and human immunodeficiency virus to those discovered relatively recently e g henipavirus metapneumovirus and norovirus The new Fifth Edition of *Viral Infections of Humans* is an invaluable reference for students fellows and established professionals in the fields of microbiology public health and infectious disease epidemiology medicine and health policy

Viral Infections of Humans Richard A. Kaslow, Lawrence R. Stanberry, Ann M. Powers, 2026-12-24 This new edition of *Viral Infections of Humans Epidemiology and Control* is a timely reference that provides scholars teachers and students of epidemiology and infectious diseases with a current comprehensive summary of what is known about the causes and consequences of infection with every virus known to cause significant human infection emphasizing its impact at the population level It presents the latest concepts methods and technologies in epidemiology detection investigation modeling and intervention While chapters include core virologic and clinical knowledge that may have changed little in the years since the publication of the fifth edition these chapters also reflect the variable often substantial degree to which the epidemiology and approaches to control have evolved The reference includes both updated and new chapters that either greatly expand on material covered only

superficially in the previous edition or introduce viruses just recently discovered to affect human populations Each chapter presents information in a uniform way summarizing the methodology biological characteristics descriptive epidemiology transmission pathogenesis control and prevention for each virus Among the contents covered include authoritative information on more recent developments and discoveries such as coronavirus disease 2019 COVID 19 updates on the rapid advances in control of hepatitis C influenza and human papilloma virus related diseases and other new developments in the field The expanded and updated sixth edition of *Viral Infections of Humans* offers a uniquely comprehensive perspective on viruses in humans from agents of classic diseases e g hepatitis measles polio rabies and yellow fever to those with greatest pandemic impact e g influenza and human immunodeficiency virus to those discovered relatively recently e g henipavirus metapneumovirus and norovirus It is an essential reference for epidemiology public health and medical students epidemiologists academic and practicing public health professionals infectious disease physicians internists and pediatricians biopharmaceutical industry professionals health policy makers and fellows and other established professionals in these fields
