

3. Cylinder Head

3-1 Construction

The cylinder head is monoblock type. Models 2TM, 3TM and 4TM have two, three, and four cylinder heads respectively. Each cylinder head is tightened to the head bolt on the cylinder block by a washer and nut.

The exhaust valve seat is made from a chilled, specially sintered alloy which is superior in heat- and wear-resisting characteristics. The large diameter intake valve has a superior air-intake capacity and results in better combustion performance. The most distinctive feature of the engine is the uniform cooling of the combustion chamber by the continuous flow of cooling water. Anti-corrosion zinc is incorporated in the cylinder head to prevent the water jacket from electrolytic corrosion.
