Young Adult Drug Treatment:

Substance Abuse in Adolescents and Young Adults Donald E. Greydanus, Gabriel Kaplan, Dilip R. Patel, Joav Merrick, 2013-10-14 The abuse of drugs and chemicals has become a problematic public health dilemma for the world's population and one that must be dealt with by parents, societies, clinicians, researchers, and even countries in the world. This book discusses the complex neurobiology that underlies drug addiction and reveals how these illicit chemicals disrupt central nervous system neurotransmission involving such neurotransmitters as serotonin, dopamine, and others. This manual reviews current understanding in drug interactions with neurotransmitter systems, neuroimmune signaling, current research on reward circuitry, and current medications used to treat drug addiction. It also discusses related topics such as drug addiction in females, comorbid conditions, drug addiction in minority populations, prenatal drug exposure, and others. The book covers new drugs of the 21st century and discusses such controversial topics as legalization of drug use. It also provides internet resources, treatment facilities by state, and parent support organizations. The importance of prevention of drug abuse is a key theme of the book.

Addiction Therapy and Treatment Larry Fritzlan, LMFT, Avis Rumney, LMFT, 2023-01-10 Addiction is a national mental and medical health crisis responsible for untold costs to society and severe suffering to innumerable people Yet addiction treatment as it is now practiced fails half the time The current treatment approach has changed little in the last 80 years and is a hodgepodge of often shady treatment approaches This book presents a radically different addiction treatment paradigm based on science evidence and best practices and has a success rate approaching 100% when followed closely This model should profoundly upend the current addiction treatment industry Nearly every addict lives in a social system a family workplace or community that enables and supports often unconsciously the addict s addiction Instead of the current addict focused approach this model extends treatment to the entire support system starting treatment with the concerned family members This model also proposes a single provider the family recovery therapist who manages treatment for the addict and the family from the first phone call through the first year of continuous sobriety This book offers simple recommendations to both addiction treatment providers and family members impacted by this disease It serves as a beacon of hope for families
