Kaplan, Michael L. Spittel, Daryn H. David, 2015-07-24 The purpose of this book is to gain a better understanding of the multitude of factors that determine longer life and improved quality of life in the years a person is alive While the emphasis is primarily on the social and behavioral determinants that have an effect on the health and well being of individuals this publication also addresses quality of life factors and determinants more broadly Each chapter in this book considers an area of investigation and ends with suggestions for future research and implications of current research for policy and practice The introductory chapter summarizes the state of Americans health and well being in comparison to our international peers and presents background

information concerning the limitations of current approaches to improving health and well being Following the introduction there are 21 chapters that examine the effects of various behavioral risk factors on population health identify trends in life expectancy and quality of life and suggest avenues for research in the behavioral and social science arenas to address problems affecting the U S population and populations in other developed and developing countries around the world Undergraduate and graduate students pursuing coursework in health statistics health population demographics behavioral and social science and health policy may be interested in this content Additionally policymakers legislators health educators and scientific organizations around the world may also have an interest in this resource Hybrid healing Lori Ann Garner,2022-12-13 Through combinations of instructive prose and incantatory verse liturgical rituals and herbal recipes Latinate learning and oral tradition the Old English remedies offer hope not only for bodily ailments but also for such dangers as solitary travel swarming bees and stolen cattle Hybrid healing works from the premise that the tremendous diversity of Old English medical texts requires an equally diverse range of interpretative methodologies Through a case study approach this exploration of early medicine offers a series of close readings tailored specifically to individual remedies drawing from a range of fields including plant biology classical rhetoric archaeology folkloristics and disability studies Embracing the endless complexity of these Old English texts Hybrid healing argues that the healing power of individual remedies ultimately derives from a dynamic and unpredictable process that is at once both deeply traditional and also ever changing **The Big Autism Cover-Up** Anne Dachel,2014-11-18 An unflinching look at the truth behind the media's lies about autism Autism now affects 2 percent of US children A once rare disorder is now so common that everyone knows someone with an affected child Yet neither mainstream doctors nor government officials can tell the American public what is behind the staggering rise in diagnoses The Big Autism Cover Up explores how news outlets downplay the impact of autism while backing the official denial of any link between the disorder and vaccines Despite never honestly and thoroughly investigating the link mainstream news sources continue to challenge those who question the safety of vaccines and the mounting evidence that an unchecked unsafe vaccination schedule is behind the exponential increase in autism Anne Dachel has spent the last ten years monitoring how the press covers autism She's seen the media promote the unrelenting message from health officials that autism hasn't really increased but rather that it is simply a matter of better diagnosing of a disorder that's always been around Meanwhile autism remains a perpetual mystery and scientists continue to guess at the genetic and environmental triggers Officially there is no known cause or cure for autism There's nothing a new mother can do to prevent a baby that was born healthy and is developing normally from regressing into autism by the age of two Despite this officials rarely express concern and adamantly refuse to call autism a crisis The Big Autism Cover Up exposes this controversy in searing detail *Identifying Individuals at Clinical High Risk of Psychosis in Different Cultures and Countries* Tianhong Zhang,Jijun Wang,Kristen Woodberry,2020-03-31 *Skin Bleaching in Black Atlantic Zones* S. Tate,2015-11-12 This book s

discussion of skin bleaching lightening and toning in Black Atlantic zones disengages with the usual tropes of Black Nationalism and global white supremacy such as the desire to be white low self esteem and self hatred and instead engages with the global multi billion dollar market in lighter skins with products from local cosmetic and pharmaceutical companies and entrepreneurs This practice can be for short term strategic purposes and the production of bleached lightness and new subjectivities through skin shades across Black Atlantic zones the UK USA Caribbean Latin America and the Africa continent is also a simultaneous critique of continuing pigmentocracy and darker skin disadvantage This book seeks to decolonize skin bleaching lightening and toning by exploring its racialized gender political and libidinal economies in the Black Atlantic In so doing it moves past the notion that global white supremacy dynamizes the practice to a position where the interaction of colourism and post race neo liberal racialization aesthetics becomes the focus
