Zen Mind, Beginner's Mind Shunryu Suzuki, 2010-11-09 In the beginner's mind there are many possibilities but in the expert's there are few So begins this most beloved of all American Zen books Seldom has such a small handful of words provided a teaching as rich as has this famous opening line In a single stroke the simple sentence cuts through the pervasive tendency students have of getting so close to Zen as to completely miss what it's all about An instant teaching on the first page And that's just the beginning In the forty years since its original publication Zen Mind Beginner's Mind has become one of the great modern Zen classics much beloved much reread and much recommended as the best first book to read on Zen Suzuki Roshi presents the basics from the details of posture and breathing in zazen to the perception of nonduality in a way that is not only remarkably clear but that also resonates with the joy of insight from the first to the last page It's a book to come back to time and time again as an inspiration to practice and it is now available to a new generation of seekers in this fortieth anniversary edition with a new afterword by Shunryu Suzuki's biographer David Chadwick

The Zen Brain Raven Walker, 2000 The greatest marvel of the universe is the human brain but it comes without an instruction manual The Zen Brain tells the compelling story of the human brain from its astonishing appearance in evolution to its perplexing present form with all its extraordinary abilities as well as its sorry penchant for aberration If left uncultivated the human mind grows like a weed garden But when disciplined in the natural way the human mind is the finest prize of nature Such a mind also tends to be more effective resilient and happy Part I Foundations begins with the origins of life that have moved relentlessly in one biological direction a better brain But the human brain appeared with abilities that far outstripped the environments that spawned it It mediates between stimulus and response in a new way It thinks Oddly we can all drive cars yet there were no cars present when we emerged Just as oddly we can go insane without any apparent organic reason Part II Applications identifies and explains in depth the

conditioning methods of self betterment With cultivation the human brain becomes the natural mind that performs better feels better and simply works better in adapting us to the many strange new environments we have created for ourselves The potential for a finer mental life a finer quality in experience exists in all humans But without discipline you have to live in the weed garden all your life

Running Home Katie Arnold, 2020-09-08 In the tradition of Wild and H Is for Hawk an Outside magazine writer tells her story of fathers and daughters grief and renewal adventure and obsession and the power of running to change your life NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE I m running to forget and to remember For more than a decade Katie Arnold chased adventure around the world reporting on extreme athletes who performed outlandish feats walking high lines a thousand feet off the ground without a harness or running one hundred miles through the night She wrote her stories by living them until eventually life on the thin edge of risk began to seem normal After she married Katie and her husband vowed to raise their daughters to be adventurous too in the mountains and canyons of New Mexico But when her father died of cancer she was forced to confront her own mortality His death was cataclysmic unleashing a perfect storm of grief and anxiety She and her father an enigmatic photographer for National Geographic had always been kindred spirits He introduced her to the outdoors and took her camping and on bicycle trips and down rivers and taught her to find solace and courage in the natural world And it was he who encouraged her to run her first race when she was seven years old Now nearly paralyzed by fear and terrified she was dying too she turned to the thing that had always made her feel most alive running Over the course of three tumultuous years she ran alone through the wilderness logging longer and longer distances first a 50 kilometer ultramarathon then 50 miles then 100 kilometers She ran to heal her grief to outpace her worry that she wouldn t live to raise her own daughters She ran to find strength in her weakness She ran to remember and to forget She ran to live Ultrarunning tests the limits of human endurance over seemingly inhuman distances and as she clocked miles across mesas and mountains Katie learned to tolerate pain and discomfort and face her fears of uncertainty vulnerability and even death itself As she ran she found herself peeling back the layers of her relationship with her father discovering that much of what she thought she knew about him and her own past was wrong *Running Home* is a memoir about the stories we tell ourselves to make sense of our world the stories that hold us back and the ones that set us free Mesmerizing transcendent and deeply exhilarating it is a book for anyone who has been knocked over by life or feels the pull of something bigger and wilder within themselves A beautiful work of searching remembrance and searing honesty Katie Arnold is as gifted on the page as she is on the trail *Running Home* will soon join such classics as *Born to Run* and *Ultramarathon Man* as quintessential reading of the genre Hampton Sides author of *On Desperate Ground* and *Ghost Soldiers*
