Too High And Too Steep Reshaping Seattles Topography:

Too High and Too Steep David B. Williams, 2015-09-01 Residents and visitors in today's Seattle would barely recognize the landscape that its founding settlers first encountered. As the city grew, its leaders and inhabitants dramatically altered its topography to accommodate their changing visions. In *Too High and Too Steep*, David B. Williams uses his deep knowledge of Seattle's scientific background and extensive research and interviews to illuminate the physical challenges and sometimes startling hubris of these large-scale transformations, from the filling in of the Duwamish tideflats to the massive regrading project that pared down Denny Hill. In the course of telling this fascinating story, Williams helps readers find visible traces of the city's former landscape and better understand Seattle as a place that has been radically reshaped. *Too High and Too Steep* was made possible in part by a grant from 4Culture's Heritage Program.

The River That Made Seattle BJ Cummings, 2020-07-15 Restores the river to its central place in the city's history. With bountiful salmon and fertile plains, the Duwamish River has drawn people to its shores over the centuries for trading, transport, and sustenance. Chief Sealth and his allies fished and lived in villages here, and white settlers established their first settlements nearby. Industrialists later straightened the river's natural turns and built factories on its banks, floating in raw materials and shipping out airplane parts, cement, and steel. Unfortunately, the very utility of the river has been its undoing: as decades of dumping led to the river being declared a Superfund cleanup site. Using previously unpublished accounts by Indigenous people and settlers, BJ Cummings's compelling narrative restores the Duwamish River to its central place in Seattle and Pacific Northwest history. Writing from the perspective of environmental justice and herself a key figure in river restoration efforts, Cummings vividly portrays the people and conflicts that shaped the region's culture and natural environment. She conducted research with members of the Duwamish Tribe, with whom she has long worked as an advocate. Cummings shares the river's story as a call for action in aligning decisions about the river and its future with values of collaboration, respect, and justice.

The City in Geography Benedict Anderson,2019-03-15 Monumental in scale and epic in development cities have become the most visible and significant symbol of human progress The geography on and around which they are constructed however has come to be viewed merely in terms of its resources and is often laid to waste once its assets have been stripped The City in Geography is an urban exploration through this phenomenon from settlement to city through physical geography which reveals an incremental progression of removing terrain topography and geography from the built environment ushering in and advancing global destruction and instability This book explains how the fall of geography in relationship to human survival has come through the loss of contact between urban dwellers and physical terrain and details the radical rethinking required to remedy the separations between the city its inhabitants and the landscape upon which it was built **The Food**

Trees of Seattle Taha Ebrahimi, 2024-04-16 The majestic trees of Seattle's neighborhoods take center stage in this illustrated and informative walking guide. Want to discover which neighborhood has the highest concentration of cherry street trees when cherry blossoms are at their peak? Eager to stroll down the only street lined with western red cedars? Curious how monkey puzzle trees made their way to the city? Using data visualization as a starting point, the author takes readers on a tour of existing street trees throughout Seattle's neighborhoods and iconic parks through charming illustrations and maps. In the process, she educates readers on the history of the trees and the city and offers up sketches of trees, leaves, and leaflets to identify trees throughout 33 different neighborhoods. The most notable of each species are highlighted so urban adventurers can fully appreciate their surroundings or design their own walking routes to experience these natural wonders in their favorite areas of the city. The book is organized alphabetically by neighborhood and each area showcases a species of tree. Includes a history of the tree and neighborhood. Offers maps and callouts for spotting the best street specimens. In an increasingly digital world, the book invites readers to slow down and embrace an analog approach to tree spotting during their urban meanderings.

Waterway David B. Williams, Jennifer Ott, HistoryLink (Firm), 2017 Why does a city surrounded by water need another waterway? Find out what drove Seattle's civic leaders to pursue the dream of a Lake Washington Ship Canal for more than sixty years and what role it has played in the region's development over the past century. Historians Jennifer Ott and David B. Williams, author of *Too High and Too Steep: Reshaping Seattle's Topography*, explore how industry, transportation, and the very character of the city and surrounding region developed in response to the economic and environmental changes brought by Seattle's canal and locks.

Stories in Stone David B. Williams, 2019-08-19 Most people do not think to observe geology from the sidewalks of a major city, but all David B. Williams has to do is look at building stone in any urban center to find a range of rocks equal to any assembled by plate tectonics. In *Stories in Stone*, he takes you on explorations to find 3.5 billion-year-old rock that looks like swirled pink and black taffy, a gas station made of petrified wood, and a Florida fort that has withstood three hundred years of attacks and hurricanes despite being made of a stone that has the consistency of a granola bar. Williams also weaves in the cultural history of stone, explaining why a white fossil-rich limestone from Indiana became the only building stone used in all fifty states, how in 1825 the construction of the Bunker Hill Monument led to America's first commercial railroad, and why when the same kind of marble used by Michelangelo clad a Chicago skyscraper, it warped so much after nineteen years that all 44,000 panels of it had to be replaced. This love letter to building stone brings to life the geology you can see in the structures of every city.

Homewaters David B. Williams, 2021-04-24 An intimate biography of place and an urgent call to conservation. Not far from Seattle skyscrapers live 150-year-old clams, more than 250 species of fish, and underwater kelp forests as complex as any terrestrial ecosystem. For millennia, vibrant Coast Salish communities have lived beside these waters, dense with nutrient-rich foods with cultures intertwined through exchanges across the waterways. Transformed by settlement and resource

extraction Puget Sound and its future health now depend on a better understanding of the region's ecological complexities. Focusing on the area south of Port Townsend and between the Cascade and Olympic mountains, Williams uncovers human and natural histories in and around the Sound. In conversations with archaeologists, biologists, and tribal authorities, Williams traces how generations of humans have interacted with such species as geoducks, salmon, orcas, rockfish, and herring. He sheds light on how warfare shaped development and how people have moved across this maritime highway in canoes, the mosquito fleet, and today's ferry system. The book also takes an unflinching look at how the Sound's ecosystems have suffered from human behavior, including pollution, habitat destruction, and the effects of climate change. Witty, graceful, and deeply informed, *Homewaters* weaves history and science into a fascinating and hopeful narrative, one that will introduce newcomers to the astonishing life that inhabits the Sound and offers longtime residents new insight into and appreciation of the waters they call home. Spirit Whales and Sloth Tales Elizabeth A. Nesbitt, David B. Williams, 2023-10-03 **The Boathouse** Leslie Jackson Chihuly, David B. Williams, William Warmus, 2023-05 This book features an exclusive glimpse into The Boathouse, the private working studio of artist Dale Chihuly, and into the history of its location on the shores of Lake Union in Seattle. Inhabited for thousands of years, this area in the Pacific Northwest has witnessed significant historical changes, innovations, and reinventions. Similarly, The Boathouse has been a place for Chihuly to experiment with and give birth to new projects and ideas, as it was for its previous owner, renowned boatbuilder George Pocock. Inside the space is representative of Chihuly's design aesthetic, showcasing pieces from his iconic bodies of work, as well as his personal collections of art and unique objects. It is also home to one of the largest hot shops in the world, where Chihuly and his team of glassblowers create works in glass for art installations and exhibitions at museums and gardens. **Area Increase of Seattle** Seattle (Wash.).
