Alan Getz, Vice President and General Manager Tax Mitsui Co Inc U S A Feinschreiber's current publication is a practical handbook that presents transfer pricing tools that can assist tax professionals of mid-sized companies to optimize profits, manage cash flows, and moderate taxes in a defensible manner. Per H. Hasenwinkle, National Practice Leader Transfer Pricing, BDO Seidman LLP, *Taxation in a Global Digital Economy*. Ina Kerschner, Maryte Somare, 2017-10-04. Time to discuss anti-BEPS measures around digitalization. In the course of the BEPS Report on Action 1, it was concluded that there was no instantaneous need for specific rules to address base erosion and profit shifting. BEPS made possible by the digitalization of enterprises and new digital businesses. At the same time, it was acknowledged that general measures may not suffice with the assessment of results to begin in 2020. While awaiting possible fundamental reforms of the tax framework, it is time to discuss anti-BEPS measures bearing in mind the peculiar features of the digital economy, such as increased mobility, no need for physical presence, and dematerialization. The book focuses on five key areas of interest: International Tax Policy, Tax Treaty Law, Transfer Pricing, Indirect Taxation Issues, and EU Law. *Taxation in a Global Digital Economy* analyses the issues and addresses the five key areas of interest from various viewpoints. *Removing Tax Barriers to China's Belt and Road Initiative*. Michael Lang, Jeffrey Owens, 2018-11-27. Since its announcement in 2013, the Belt and Road Initiative (BRI), also known as the New Silk Road, has gradually gained international recognition. The project requires not only extensive investment in infrastructure and transportation but also an acceleration of the internationalization of multinationals and supply chains in Belt and Road countries. The project will hopefully lead governments and businesses in countries along the Belt and Road to compete, adopt best practices, and improve transparency. The BRI marks a national push by China to increase economic links to Southeast Asia, Central Asia, Russia, the Baltic region, Central and Eastern Europe, Africa, and Latin America, which will have major consequences for the way that tax systems interact. Emerging from the research conducted by the WU Global Tax Policy Center in cooperation with several Chinese universities, this book offers fourteen policy-relevant research papers prepared by international experts on the following issues: The New Silk Road: Will Tax Be a Facilitator or a Barrier? Neo-BEPS: China's Prescription for International Tax Reform. Embodying the Rationality of the Belt: International Taxation Coordination under China's Belt and Road Strategy. Tax Issues in the Main Belt and Road Countries and Industries of China's Outward Foreign Direct Investment. Preferential Arrangements under Chinese Tax Treaties with Belt and Road Countries and Disputes Regarding Their Applicability. Tax Planning by Going Global: Enterprises for Cross-Border Earnings. Observations Based on Belt and Road Countries. International Taxation Issues under the Belt and Road Initiative. Corporate Income Tax Laws and Tax Treaties. Financial and Tax Operations in the Five Central Asian Countries. The Role of Border-Crossing Procedures in the Transportation of Goods along the New Silk Road. Transfer Pricing Issues Related to the Belt and Road Initiative. Tax Treaties

between Belt and Road Countries VAT Challenges in the Belt and Road Initiative Global Tax Policy Post BEPS and the Perils of the Silk Road and Creating a Positive Tax Climate for Complex Multijurisdictional Investment Projects Outcomes presented in the book consist of findings presented during Tax Policy Forum on the Belt and Road Initiative held on 12-13 June 2017 in Beijing jointly organized with Peking University Tax Law Center and the Central University of Finance and Economics Beijing. These papers also formed the basis for input by WU Global Tax Policy Center at the first meeting of The Belt and Road Initiative Tax Cooperation Conference BRITCC held in Astana on 14-16 May 2018 in which it was agreed to establish a permanent forum to examine the tax issues that arise from the BRI. The WU Global Tax Policy Center will continue to provide inputs to this forum.

Transfer Pricing Developments Around the World 2022 Michael Lang, Raffaele Petruzzi, 2022-10-11

Intensive work on transfer pricing, one of the most relevant and challenging topics in the international tax environment, continues to increase worldwide at every level of government and international policy with a far-reaching impact on countries' legislations, administrative guidelines, and jurisprudence. This book presents an in-depth, issue-by-issue analysis of the current state of developments along with suggestions for future solutions to the problems raised. Emerging from the research conducted by the WU Transfer Pricing Center at the Institute for Austrian and International Tax Law at WU Vienna University of Economics and Business, this book offers eight topic-based chapters prepared by international experts on transfer pricing. Greatly helping to define recent transfer pricing issues around the world, this book encompasses the following topics: Global Transfer Pricing Developments; Transfer Pricing Developments in the European Union; Transfer Pricing Developments in the United States; Transfer Pricing Developments in Developing Countries and Emerging Economies; Recent Developments on Transfer Pricing in the Post-Covid 19 Era; Recent Developments on Transfer Pricing and Substance; Recent Developments on Transfer Pricing and Business Restructurings; Recent Developments on Transfer Pricing and New Technologies. The intense work of international organizations such as the OECD, UN, and other international organizations, as well as the intense work of the EU, is thoroughly analyzed in this book. The detailed analysis will be of immeasurable value to the various players, including international organizations, the business community, and advisory firms, corporate CEOs and CFOs, and government officials, as well as to tax lawyers, in-house counsel, and interested academics, in facilitating efficient dialog and a coordinated approach to transfer pricing in the future.

**Transfer Pricing and the Arm's Length Principle in International Tax Law** Jens Wittendorff, 2010-01-01

The arm's length principle serves as the domestic and international standard to evaluate transfer prices between members of multinational enterprises for tax purposes. The OECD has adopted the arm's length principle in Article 9 of its Model Income Tax Convention in order to ensure that transfer prices between members of multinational enterprises correspond to those that would have been agreed between independent enterprises under comparable circumstances. The arm's length principle provides the legal framework for governments to have their fair share of taxes and for enterprises to avoid double taxation on their profits. This timely book contains a comparative analysis

of the legal basis for the arm's length principle and the contents of the arm's length rules in US tax law as well as in the OECD Model Tax Convention and Transfer Pricing Guidelines. It includes a thorough review of international case law on transfer pricing from the United States, Canada, Australia, United Kingdom, Germany, France, the Netherlands, Denmark, Sweden, and Norway. The book ends with an analysis of the issues associated with the application of the arm's length principle for multinational enterprises in a global economy.
