Developing Children's Critical Thinking through Picturebooks Mary Roche, 2014-07-25. This accessible text will show students and class teachers how they can enable their pupils to become critical thinkers through the medium of picturebooks. By introducing children to the notion of making meaning together through thinking and discussion, Roche focuses on carefully chosen picturebooks as a stimulus for discussion and shows how they can constitute an accessible multimodal resource for adding to literacy skills while at the same time developing in pupils a far wider range of literary understanding. By allowing time for thinking about and digesting the pictures as well as the text, and then engaging pupils in classroom discussion, this book highlights a powerful means of developing children's oral language ability, critical thinking, and visual literacy while also acting as a rich resource for developing children's literary understanding. Throughout, Roche provides rich data and examples from real classroom practice. This book also provides an overview of recent international research on doing interactive read-alouds, on what critical literacy means, on what critical thinking means, and on picturebooks themselves. Lecturers on teacher education courses for early years or primary levels, classroom teachers, pre-service education students, and all those interested in promoting critical engagement and dialogue about literature will find this an engaging and very insightful text.

Matthew Lipman and Ann Margaret Sharp Roberto Franzini Tibaldeo, 2023-03-14 This book explores the contribution to education contained in the theoretical work and teaching practice of Matthew Lipman 1923 2010 and Ann Margaret Sharp 1942 2010 Their long lasting cooperation gave rise to the well known Philosophy for Children P4C curriculum which is nowadays globally widespread P4C basically relies on the following innovations firstly the unprecedented connection between philosophy and childhood secondly the reframing of philosophy in practical viz not reductively theoretical terms thirdly the employment of philosophy to foster democracy and moral capabilities through the development of children s thoughtfulness and autonomous thinking which would eventually result in empowering children s social abilities and increasing their self defence against consumerism propaganda and manipulation finally the stand against a strictly cognitivist approach to education More than just contextualizing these innovations in the coeval historical and social context the author shows that P4C s revolutionary stance on education relies on the fruitfulness of Lipman and Sharp s intellectual cooperation and on their manifold abilities as researchers teachers trainers communicators motivators and community builders The book analyzes their philosophical

educational vision and the scholastic curriculum they developed jointly additionally it provides a critical appraisal of P4C s achievements as well as of its future perspectives Philosophy and Community Amanda Fulford, Grace Lockrobin, Richard Smith, 2020-01-09 Why should we care about philosophy Public philosophy or doing philosophy in the community is an important and growing trend revealed not only by the phenomenon of the Parisian philosophy caf but also the contemporary rise of multiple grassroots projects for example the Philosophy in Pubs movement This book is the first to offer academic examination of the theoretical contributions and practical applications of community philosophy Bringing together voices from diverse contexts and subject areas from activism and political action to religious environments arts organisations and museums to maximum security prisons this collection asks key questions about the point of making philosophy available for everyone How do you do philosophy with the public Is philosophy in the community the same as academic philosophy Why is community philosophy important Including contributions from practitioners and researchers from professional philosophy education healthcare and community philosophy this collection offers perspectives on a growing area of study It offers a timely and critical introduction to and analysis of what philosophy can be when grounded in socially engaged activities
