Genetically Modified Democracy Aniket Aga,2021-11-23 How the debate over genetically modified crops in India is transforming science and politics Genetically modified or transgenic crops are controversial across the world Advocates see such crops as crucial to feeding the world s growing population critics oppose them for pushing farmers deeper into ecological and economic distress and for shoring up the power of agribusinesses India leads the world in terms of the intensity of democratic engagement with transgenic crops Anthropologist Aniket Aga excavates the genealogy of conflicts of interest and disputes over truth that animate the ongoing debate in India around the commercial release of transgenic food crops The debate may well transform agriculture and food irreversibly in a country already witness to widespread agrarian distress and over 300 000 suicides by farmers in the last two decades Aga illustrates how state science and agrarian capitalism interact in novel ways to transform how democracy is lived and understood and sheds light on the dynamics of technological change in populous unequal polities

The Diffusion of Social Movements Rebecca Kolins Givan,Kenneth M. Roberts,Sarah A. Soule,2010-07-19 It is widely recognized that social movements may spread or diffuse from one site to another Such diffusion however is a complex and multidimensional process that involves different actors networks and mechanisms This complexity has spawned a large body of literature on different aspects of the diffusion process yet a comprehensive framework remains an elusive target This book is a response to that need and its framework focuses on three basic analytical questions First what is being diffused Second how does diffusion occur Finally what is the impact of diffusion on organizational development and shifts in the scale of contentious politics This volume suggests that diffusion is not a simple matter of political contagion or imitation rather it is a creative and strategic process marked by political learning adaptation and innovation
