It goes on to analyze the consequences of socialist cultural and social transformations on pastoral Kazakh and other identities and outlines the implications of socialist nation building on post socialist Mongolian national identity. Overall Socialist and Post Socialist Mongolia highlights how Mongolia's population of widely scattered seminomadic pastoralists posed challenges for socialist administrators attempting to create a homogenous mass nation of individual citizens who share a set of cultural beliefs, historical memories, collective symbols and civic ideas. This book captures the diverse voices of emerging and established ELT practitioners and scholars originally from and/or operating in non-Western contexts, spanning not only the so-called non-Western peripheries but also peripheries created within the center when certain members are minoritized on the basis of their race, language and/or place of origin. The chapters address a range of related issues occurring at the intersections of personal and professional identities, pedagogy and classroom interactions as well as research and professional practices in liminal transnational spaces.
