

## Initial Flip, Slide and Turn Art Lesson

### **Materials:**

- Markers
- Ruler
- 3 piece of paper
- Stencils

### **Steps: Slide**

1. Fold your page so that it is equally divided into four areas.
2. Trace your letter using the stencil provided in the top left hand box.
3. Slide your shape right 1 unit and down 1 unit.
4. Trace your letter again using the stencil provided making sure that the letter is facing the same way.

### **Steps: Turn**

1. Fold your page so that it is equally divided into four areas.
2. Trace your letter on a piece of cardboard.
3. Put your stencil letter in the first box. After you have traced your letter. Rotate it a 90° turn clockwise in the next box. Continually rotate 90° clockwise for the following two boxes.
4. Outline your letter using a black marker and then colour your letter in and give each box a unique background that turns with the letter.

### **Steps: Flip**

1. Fold your page so that it is equally divided into four areas.
2. After you have completed the turns of your letter. You will now be doing mirror flips of your letter into two different ways.
3. Using your cardboard letter. Place your letter the proper way it would appear on the alphabet. Reflect your letter.
4. After you have done your letter the proper way you may put it any way you wish and reflect that.
5. Make sure you are reflecting not only the letter, but also the background.

**Frameworks for Integrated Project-Based Instruction in STEM Disciplines** Anthony J. Petrosino, Candace Walkington, Denise Ekberg, 2024-01-01 Frameworks for Integrated Project Based Instruction in STEM Disciplines presents an original approach to Science Technology Engineering and Mathematics STEM centric project based instruction We approach project based instruction from an engineering design philosophy and the accountability highlighted in a standards based environment We emphasize a backward design that is initiated by well defined outcomes tied to local state or national standards that provide teachers with a framework guiding students design solving or completion of ill defined tasks In project based STEM classrooms students investigate utilize technological tools construct artifacts participate in debates collaborate and make products to demonstrate what they have learned Features include deep coverage of four topics in PBI scaffolding student driven inquiry driving questions and development of lessons based on national and state standards This focus will ensure a deep understanding by the reader of project based instruction which will allow the reader to create strong and meaningful lesson experiences for their students An emphasis on student driven inquiry will be discussed including the importance of giving students the cognitive tools such as statistical analysis tools they need to research and inquire about the lesson topic A breakdown of what a successful driving question includes will be explained and examples given The book will include strategies for starting the lesson process with ending goals in mind by creating driving questions and breaking down state and national standards This book is strongly rooted in research in the learning sciences about project based instruction but will also be designed to be practically useful to teachers and teacher educators and researchers by bridging research and practice

**Drawn Toward Transformation** Nadine Kalin, 2009-01-01 This book examines the transformative potential of collaborative teacher research Specifically Kalin shares the perspectives of educators as they investigate the teaching and learning of drawing within their

own elementary classrooms and within the context of an action research group The innovative a r tographic design of the project provides a rich balance between the arts and educational research as it allows for the complex unfolding of relational transformation alongside the artistic renditions of each person exploring their understandings of drawing The products and processes of this book provide alternative approaches for the design of future pre service and in service programs that aim to serve teachers as learners rather than teachers as teachers In this vein the book offers worthy insights into how the arts and collaborative action research groups assist participants in finding other ways of seeing imaging and knowing the world The book will appeal to practitioners teacher educators educational researchers as well as those interested in professional development complexity thinking curriculum studies collaborative action research and arts based educational research methodologies

**Handbook of Research on Transformative and Innovative Pedagogies in Education** Keengwe, Jared,2022-05-13 Various pedagogies such as the use of digital learning in education have been used and researched for decades but many schools have little to show for these initiatives This contrasts starkly with technology supported initiatives in other fields such as business and healthcare Traditional pedagogies and general digital technology applications have yet to impact education in a significant way that transforms learning A primary reason for this minimal impact on learning is that digital technologies have attempted to make traditional instructional processes more efficient rather than using a more appropriate paradigm for learning As such it is important to look at digital technology as a partner and use transformative applications to become partners with students not teachers to empower their learning process both in and out of school The Handbook of Research on Transformative and Innovative Pedagogies in Education is a comprehensive reference that identifies and justifies the paradigm of transformative learning and pedagogies in education It provides exemplars of existing transformative applications that if used as partners to empower student learning have the potential to dramatically engage students in a type of learning that better fits 21st century learners Covering topics such as gamification project based learning and professional development this major reference work is an essential resource for pre service and in service teachers educational technologists instructional designers educational administration and faculty researchers and academicians seeking pedagogical models that inspire students to learn meaningfully
