

Removing the bobbin case

Lift or remove the extension plate, open the shuttle door. There is a small recess on the free arm to facilitate the opening of the shuttle door.

Grasp the bobbin case with the thumb and index finger so that the latch is depressed and draw out the bobbin case. The bobbin will remain in the case as long as the latch is depressed. When you release the catch, the bobbin will be released.

Bobbin winding

Take an empty bobbin from the accessory box. On one side of the bobbin there is a marking. Turn the bobbin with the marking outwards and slide the bobbin onto the bobbin spindle which is located on the right side of the machine. Place the thread over the bobbin. Start from above and wind the thread a few times around the bobbin. Hold the end of the thread while you press down the foot control. Release the thread end as soon as winding starts. Stop winding before the bobbin is completely filled — about 1/32" (1 mm) from the rim (outer edge).
