

Connecting the machine

Connecting the foot control

Remove the cord from the foot control and place the control under the table. Insert the foot control plug into the socket on the right side of the machine.

The plug is marked UP for ease in connecting to machine.

Connecting to the wall outlet

The voltage (V) and frequency (Hz) are indicated under the base of the machine. Check that these ratings correspond to those of the power supply before connecting the machine.

Main switch

The light and the machine are turned on by pressing the main switch. This makes it easy to see that the machine is ready for sewing.

Speed control and needle stop-right

The speed is controlled by means of the foot control. Press the foot control down lightly and the machine will start sewing at the lowest stitch speed. This speed is suitable for precision sewing and on occasions when you wish to have better control for intricate work.

When you depress the foot control further the machine will run faster. The needle has full penetration power all the time.

When you lift your foot from the control the needle will always stop at its upper position so it is not necessary to think about the needle position at the start or finish of a seam. If you wish to turn the fabric when sewing around a corner for example, it is easy to get the needle to stop down in the fabric. Just press the foot control down quickly and release it again.
