

Young people, pornography and violence against women

Change the story: A shared framework for the primary prevention of violence against women and their children in Australia demonstrates how gender inequality is a key driver of violence against women.

There are four expressions of gender inequality that consistently predict higher rates of violence against women. These are reflected in pornography in the following ways:

1. Rigid gender roles and stereotypes

Pornography generally depicts men as dominant and controlling, while women are submissive and eager to comply with the demands of male characters. Research has found links between the use of pornography and ideas supporting male dominance and female sexual objectification.

2. Men's control and limits to women's independence

Pornography often prioritises male characters' preferences and depicts females being forced or expected to perform sex acts. Research shows young people watching pornography more often were more likely to believe women should learn to obey men, and that things are better when men are in charge.

3. Condoning of violence against women

Pornography routinely depicts aggression and violence against women, normalising and trivialising this kind of behaviour. Pornography consumption has been found to be associated with sexual aggression and victim-blaming attitudes.

4. Male peer relationships emphasising aggression and disrespect towards women

Watching pornography in a group can be a form of 'male bonding' that is built on an acceptance or enjoyment of aggression towards women. Additionally, pornography itself often depicts negative male peer relations, such as groups of men having sex with one woman and bonding via their aggressive or degrading behaviour toward her.

Against Pornography Diana E. H. Russell, 1993 Because Dr Diana Russell believes that seeing pornography is the most powerful evidence of the woman hatred inherent in it she reprinted over 100 examples of pornographic photographs in this book She chose to risk being sued for publishing these pictures because she was unwilling to obtain permission from the pornographers Against Pornography also contains a succinct summary of some of the major scientific research on this subject and an explication of her original and convincing theory of how pornography causes rape
