Starcher, 2015-11-18 Introduction to Renewable Energy Second Edition covers the fundamentals of renewable energy and serves as a resource to undergraduates in renewable energy courses non specialists within the energy industries or anyone working to support the successful implementation of renewable energy The second edition discusses developments that have occurred *Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems* Mani, Nandita S., Cawley, Michelle A., 2022-05-06 Beyond providing space for data science activities academic libraries are often overlooked in the data science landscape that is emerging at academic research institutions Although some academic libraries are collaborating in specific ways in a small subset of institutions there is much untapped potential for developing partnerships As library and information science roles continue to evolve to be more data centric and interdisciplinary and as research using a variety of data types continues to proliferate it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part The Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries It provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff engage in the research enterprise contribute to curriculum development and help build a stronger ecosystem where libraries are part of data science Covering topics such as data science initiatives digital humanities and student engagement this book is an indispensable resource for librarians information professionals academic institutions researchers academic libraries and academicians

Science Dynamics and Research Production Nikolay K. Vitinov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of

qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative
