Congress. House. Committee on Armed Services. Subcommittee on Military Personnel,2000 *Futuristic Cars and Space Bicycles* Jeremy Withers,2020 Examining representations of cars and bicycles in American science fiction from the late nineteenth century to the present day Futuristic Cars and Space Bicycles argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity Rather the genre often scorns and ridicules the automobile and instead promotes more sustainable more benign more restrained technologies of movement such as the bicycle *The Holodeck in the Garden* Peter Freese,Charles B. Harris,2004 Collecting twenty essays written by distinguished scholars from the United States and Germany The Holodeck in the Garden offers an informative tour of the complex interrelations between science technology and contemporary American literature Contributors include Michael Berube writing on Colson Whitehead s The Intuitionist Joseph Conte on William Gibson and Bruce Sterling David Cowart on Don DeLillo s Cosmopolis Carl Djerassi on science in fiction N Katherine Hayles on Neal Stephenson s Cryptonomicon Ursula Heise on risk and narrative in the contemporary novel John Johnston on network theory Brian McHale on Harry Mathews Kathy Acker and Gilbert Sorrentino Joseph Tabbi on William Gaddis and Curtis White on the Great American Disaster Machine *Non-humans in Social Science* Karolína Pauknerová,Marco Stella,Petr Gibas,2014-12-01 The book explores the issue of non humans and their role and position within

contemporary social sciences Inspired by current trends of bridging the dichotomy of nature and culture the authors use the non human as a prism that offers a different perspective of the world society culture and last but not least beings To start paying attention to non humans has the potential to hybridize social sciences and in turn enrich them as well as to offer social scientists novel perspectives and tools to approach social phenomena Such an attitude might in turn lead to a reassessment of understanding of the relationship between the world and being and of the categories of being and subject Hence the potential of non humans to stimulate an ontological shift within social sciences The view of the human and non human as oppositional categories is a remnant of essentially modernist thinking This book represents a response in terms of an attempt to think about humans and non humans outside of the binary division The authors thus want to contribute to the hybridization of social sciences and throughout the book they deal with ontological epistemological and thematical shifts stemming from the hybridization If the non human does not exist as a negation the boundary between the two becomes unclear and overlapping It is with this hybridization the blurring of the boundaries that we are able to come closer to those who inhabit the world non humans and humans alike

Beyond Tomorrow Ingo Cornils, 2020 Shows German Science Fiction's connections with utopian thought and how it attempts Zukunftsbewältigung coping with an uncertain but also unwritten future

Gender, Race, and American Science Fiction Jason Haslam, 2015-05-08 This book focuses on the interplay of gender race and their representation in American science fiction from the nineteenth century through to the twenty first and across a number of forms including literature and film Haslam explores the reasons why SF provides such a rich medium for both the preservation of and challenges to dominant mythologies of gender and race Defining SF linguistically and culturally the study argues that this mode is not only able to illuminate the cultural and social histories of gender and race but so too can it intervene in those histories and highlight the ruptures present within them The volume moves between material history and the linguistic nature of SF fantasies from the specifics of race and gender at different points in American history to larger analyses of the socio cultural functions of such identity categories SF has already become central to discussions of humanity in the global capitalist age and is increasingly the focus of feminist and critical race studies in combining these earlier approaches this book goes further to demonstrate why SF must become central to our discussions of identity writ large of the possibilities and failings of the human past present and future Focusing on the interplay of whiteness and its various others in relation to competing gender constructs chapters analyze works by Nathaniel Hawthorne Mary E Bradley Lane Edgar Rice Burroughs Philip Francis Nowlan George S Schuyler and the Wachowskis Frank Herbert William Gibson and Octavia Butler Academics and students interested in the study of Science Fiction American literature and culture and Whiteness Studies as well as those engaged in critical gender and race studies will find this volume invaluable
