Pablo Iannone,2017-07-12

This essential volume for professionals and academics proposes a new approach to environmental ethics and to environmental policymaking in particular All too frequently policy makers focus only on what ends should ideally be pursued ignoring whether the means have any negative unintended consequences Such approaches tend to have a focus on consequentialist deontological virtue cantered or care based theories which makes them too singularly minded They are not suitable for dealing with the complexities of life and especially environmental policy making Practical Environmental Ethics distinguishes between cases in which entire ecosystems are at risk threatening entire societies where collective consequences take precedence and cases in which whole ecosystems are not at risk where individual rights or duties take precedence In doing this Iannone discusses environmental controversies not only philosophically but in the complex contexts at work within policy making and decision making communities This allows for consideration of crucial concepts used in morality biology technology business economics politics and philosophy Relying on numerous actual environmental cases Iannone helps formulate realistic ways of logically and ethically determining how environmental controversies should be addressed Ultimately he proposes solutions that policy makers and anyone interested in this topic may utilize to clarify environmental issues and determine how to best deal with them for the greater good *The Routledge Handbook of Latin American Development* Julie Cupples,Marcela Palomino-Schalscha,Manuel Prieto,2018-12-07

The Routledge Handbook of Latin American Development seeks to engage with comprehensive contemporary and critical theoretical debates on Latin American development The volume draws on contributions from across the humanities and social sciences and unlike earlier volumes of this kind explicitly highlights the disruptions to the field being brought by a range of anti capitalist decolonial feminist and ontological intellectual contributions The chapters consider in depth the harms and suffering caused by various oppressive forces as well as the creative and often revolutionary ways in which ordinary Latin Americans resist fight back and work to construct development defined broadly as the struggle for a better and more dignified life The book covers many key themes including development policy and practice neoliberalism and its aftermath the role played by social movements in cities and rural areas the politics of water oil and other environmental resources indigenous and Afro descendant rights and the struggles for gender equality With contributions from authors working in Latin America the US and Canada Europe and New Zealand at a range of universities and other organizations the handbook is an invaluable resource for students and teachers in development studies Latin American studies cultural studies human geography anthropology sociology political science and economics as well as for activists and development practitioners **Hunter-gatherers in a Changing World**

Oil Injustice Patricia Widener, 2011-09-16 Oil Injustice examines the mobilization efforts of four communities with different oil histories in response to the construction of an oil pipeline Using multiple sites in Ecuador as case studies Patricia Widener examines the efforts of grassroots groups non governmental organizations activist mayors and transnational advocates that mobilized to redefine the country's oil path and to represent the voice of many local communities and organizations that sought to offer an alternative to the nation's oil dependency and to the use of its oil wealth These groups generated divergent and at times rival reactions to the pipeline though at their core the multiple campaigns developed from a shared history and awareness of a number of marginalized communities and degraded environments in areas most important to the oil process Widener shows that global environmental justice demands are bound within a capitalist political system where community activists national NGOs and their international allies are forced to seek local change rather than attempt to defeat a disabling and unequal system

The Image of the River in Latin/o American Literature Jeanie Murphy, Elizabeth G. Rivero, 2017-12-20 Although fictional and often fantastic representations of nature have been a distinguishing feature of Latin American literature for centuries ecocriticism understood as the study of literature as it relates to depictions of the natural world environmental issues and the ways in which human beings interact and identify with their natural surroundings did not emerge as a field of scholarly interest in the region until the end of the twentieth century This volume employs an ecocritical lens in order to explore and question the use of the river imagery in Latino and Latin American literature from the colonial period to our modern world creating a space in which to examine both its literal and figurative meanings associated as much with processes of a personal nature as with those of the collective experience in the region The slow meandering streams of nostalgia the raging currents of conflict or the stagnant waters of social decay are just a few of the ways in which the river has become an important symbol and inspiration to many of the region's writers This book offers a diverse collection of writings that through a trans historical and trans geographical perspective allows us from the vantage point of the twenty first century to reflect on the rich and dynamic image of the river and by extension on the vital context of Latin o America its people and societies
