Handbook of Research in Educational Communications and Technology M. J. Bishop, Elizabeth Boling, Jan Elen, Vanessa Svihla, 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field However given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996 the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies rather than to focus on the things we are using to solve those problems Additionally for the first time this edition of the Handbook reflects our field's growing understanding of the importance of design scholarship to inform practice by including design case chapters These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education's increasingly complex issues Provides comprehensive reviews of new developments in educational technology research and design practice Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology

Fantasy and the Real World in British Children's Literature Caroline Webb, 2014-09-15 This study examines the children's books of three extraordinary British writers J K Rowling Diana Wynne Jones and Terry Pratchett and investigates their sophisticated use of narrative strategies not only to engage children in reading but to educate them into becoming mature readers and indeed individuals The book demonstrates how in quite different ways these writers establish reader expectations by drawing on conventions in existing genres only to subvert those expectations Their strategies lead young readers to evaluate for themselves both the power of story to shape our understanding of the world and to develop a sense of identity and agency Rowling Jones and Pratchett provide their readers with fantasies that are pleasurable and imaginative but far from encouraging escape from reality they convey important lessons about the complexities and challenges of the real world and how these may be faced and solved All three writers deploy the tropes and imaginative possibilities of fantasy to disturb challenge and enlarge the world of their readers *The Great Globe and All Who It Inherit* David

Kellogg, 2014-11-04 Every storyteller soon discovers the difference between putting a story inside children and trying to extract it with comprehension questions and putting children inside a story and having them act it out Teachers may experience this as a difference in difficulty or in the level of motivation and enthusiasm or even in the engagement of creativity and imagination and leave it at that This book explores the divide more critically and analytically finding

symmetrical and even complementary problems and affordances with both approaches First we examine what teachers actually say and do in each approach using the systemic functional grammar of M A K Halliday Secondly we explore the differences developmentally using the cultural historical psychology of L S Vygotsky Thirdly we explain the differences we find in texts by considering the history of genres from the fable through the plays of Shakespeare Inside and Outside the story turn out to be two very different modes of experiencing the one reflective and narrativizing and the other participatory and dialogic These two modes of experience prove to be equally valuable and even mutually necessary but only in the long run different approaches are necessary at different moments in the lesson different points in development and even different times in human history In the final analysis though this distinction is meaningless to children and to their teachers unless it is of practical use Each chapter employs only the most advanced technology ever developed for making sense of human experience namely thinking and talking though not necessarily in that order So every story has a specific narrative to tell a concrete set of dialogues to try and above all a practicable time and a practical space for children their teachers and even their teachers teachers to talk and to think

The Nonhuman in American Literary Naturalism Karin M.

Danielsson, Kenneth K. Brandt, 2023-09-05 The Nonhuman in American Literary Naturalism responds to a need to expand and refine the connections among nonhuman studies and American literary naturalism and to productively expand the scholarly discourse surrounding this vital movement in American literary history This collection focuses on that which becomes visible when the human subject is skirted or moved off center in other words the representation of nonhuman animals and other vital or inert species things entities cityscapes and seascapes that play an important part in American literary naturalism Informed by animal studies ecocriticism posthumanism new materialism and other recent theoretical perspectives the essays in this collection discuss early naturalist texts as well as more recent naturalistic oriented authors
