Sports Law for Educational Institutions Steven C. Wade, Robert D. Hay, 1988-11-14 This impressive new source is the first book to give school administrators and nonspecialist legal advisors practical working knowledge of the legal principles, judicial interpretations and case law relating to organized sports in an academic environment. The judicial opinions that comprise the bulk of the text have been edited and supplemented with notes and comments explaining the principles and applications that will help administrators avoid potential liability. The book is organized into four sections which cover the main areas of legal concern. The first section examines the athlete's right of participation and the equal opportunity provisions that currently apply. The second looks at the problem of reconciling the civil rights of participants with the disciplinary authority of administrators. The final two sections deal with products liability of equipment manufacturers and tort liability of program sponsors. The authors' comments accompany every case cited and the legal principles and judicial interpretations relating to each. No school can afford to be without this essential tool for understanding the legal pitfalls involved with running a sports program. *Federal Supplement*, 1969 **Symposium**, 2009 **Richard Nixon's Court** George D. Cameron III, 2024-09-02 The main themes of this second book in The Age of Nixon Series are that President Nixon well understood the importance of the Supreme Court and that his efforts to change the Court's policy preferences were more successful than has been generally realized. More specifically, Nixon recognized the policy problem he made a determined effort to change what he could during his presidency and his efforts were merely the opening salvo in what has become a decades-long process to remake the Court. This book lets the twenty-nine Justices speak for themselves via their votes in actual cases. Those votes are the book's main data points. The cases that appear in this book are by no means all of the cases the Supreme Court has decided on the eleven topics addressed within Federalism, Interstate Commerce, Right to Counsel, Keep and Bear Arms, Freedom of Religion, Freedom of Speech, Property Rights, Voting Rights, Education Rights, Employee Rights, and Competition Rights. Rather, the book's primary focus is a comparison of the post-1968 voting patterns of the five Warren Court holdover justices and President Nixon's and later replacement justices as well as comparisons between and among the various replacement justices. This book's author, Professor George D. Cameron III, taught Law for forty-three years at what is now the Ross Business School at the University of Michigan. Many of the cases included in this book are old friends of his that he used in the classroom and in his three Business Law textbooks. The book is also enriched by the additional perspectives derived from the author's advanced studies in Political Science at Michigan and at Kent State University. He is thus able to assemble a sizable body of relevant data and then utilize it to provide unique insights into the remaking of the Supreme Court, a process begun by President Nixon. **SAA Newsletter**, 2001 **The Good Red Road** Kenneth Lincoln, 1997-01-01 In 1975, Kenneth Lincoln went on the road with his small daughter and four students traveling from Los Angeles through Arizona, New Mexico, Nebraska, and the Dakotas, searching for the essence of the Indian experience.
