Tuna Love Death And Mercury:

Tuna Richard Ellis,2009-07-14 Famed marine researcher and illustrator Richard Ellis brings us a work of scientific achievement that will forever change the way we think about fish fishing and the dangers inherent in the seafood we eat The bluefin tuna is one of the world s biggest fastest and most highly evolved marine animals as well as one of its most popular delicacies Now however it hovers on the brink of extinction Here Ellis explains how a fish that was once able to thrive has become a commodity and how the natural world and the global economy converge on our plates With updated information on mercury levels in tuna this is at once an astounding ode to one of nature s greatest marvels and a serious examination of a creature and world at risk

The Power of the Sea Bruce Parker,2025-10-16 The Power of the Sea describes our struggle to understand the physics of the sea so we can use that knowledge to predict when the sea will unleash its fury against us In a wide sweeping narrative spanning much of human history Bruce Parker former chief scientist of the National Ocean Service interweaves thrilling and often moving stories of unpredicted natural disaster with an accessible account of scientific discovery The result is a compelling scientific journey from ancient man s first crude tide predictions to today s advanced early warning ability based on the Global Ocean Observing System It is a journey still underway as we search for ways to predict tsunamis and rogue waves and critical aspects of El Ni o and climate change caused by global warming

Animal Oppression and Capitalism David Nibert,2017-09-08 This important two volume set unapologetically documents how capitalism results in the oppression of animals ranging from fish and chickens to dogs elephants and kangaroos as well as in environmental destruction vital resource depletion and climate change Most traditional narratives portray humanity s use of other animals as natural and necessary for human social development and present the idea that capitalism is generally a positive force in the world But is this worldview accurate or just a convenient easy to accept way to ignore what is really happening a systematic oppression of animals that simultaneously results in environmental destruction and places insurmountable obstacles in the path to a sustainable and peaceful future David Nibert s *Animal Oppression and Capitalism* is a timely two volume set that calls into question the capitalist system at a point in human history when inequality and the imbalance in the distribution of wealth are growing domestically and internationally Expert contributors show why the oppression of animals particularly the use of other animals as food is increasingly being linked to unfavorable climate change and the depletion of fresh water and other vital resources Readers will also learn about the tragic connections between the production of animal products and global hunger and expanded regional violence and warfare and they will understand how many common human health problems including heart attacks strokes and various forms of cancer develop as a result of consuming animal products

The Limits of Private Governance Florian Grisel,2021-09-09 Is there a future for the law In this book Florian Grisel addresses one of the most fascinating questions raised by social scientists in the past few decades Since the 1980s socio legal scholars have argued that governance based on social norms or private governance can offer an

alternative to regulation by the law On this account private governance could be socially efficient and even optimal compared with other modes of governance The Limits of Private Governance supplements this optimistic analysis of private governance by assessing the long term evolution of a private order in the fishery of Marseille In the last eight centuries the fishers of Marseille have regulated their community without apparent means of legal support from the French state In the early 15th century they even created an organisation called the Prud homie de P che in order to regulate their fishery Based on archival evidence interviews and ethnographic data Grisel examines the evolution of the Prud homie de P che and argues that the strong social norms in which it is embedded are not only powerful tools of governance but also forces of inertia that have constrained its regulatory action The lessons drawn from this book will appeal to academics policy makers and members of the general public who have an interest in the governance of our modern societies **On Thin Ice** Richard Ellis,2010-12-07 From a graceful writer who s written some of the best natural history books of the past decade The New York Times Book Review comes an urgent stirring celebration and a rallying cry on behalf of one of earth s greatest natural treasures Polar bears fierce and majestic have captivated us for centuries Feared by explorers revered by the Inuit and beloved by zoo goers everywhere they are a symbol for the harsh beauty and muscular grace of the Arctic But as global warming threatens the ice caps integrity the polar bear has also come to symbolize the environmental peril that has arisen due to harmful human practices In the past twenty years alone the world population of polar bears has shrunk by half Today they number just 22 000 *Disentangled* R. France,2023-09-14 The Definitive Study and Solution to the Centuries old Mystery of the World s Most Sighted Sea Serpent There is a long history of conflating sightings of unidentified marine objects UMOs as purported sea serpents Most sightings are either of an extremely brief duration or made by a single observer and thus often easy to dismiss This is not the case however with respect to the so called Gloucester Sea Serpent which frequented the Massachusetts and New York coasts during the early nineteenth century Witnessed by hundreds of people for extended periods repeatedly over many days the Gloucester UMO is the most sighted sea serpent in history As well due to being the object of study at the time and shortly thereafter by naturalists the mysterious creature remains the most thoroughly investigated of all putative sea serpents For these reasons it has achieved an exalted status among cryptozoologists who maintain it represents the best evidence for the existence of sea serpents For the first time an eminently qualified aquatic biologist and ethnozoologist presents the definitive history of the phenomena and carefully examines the evidence It is concluded that the most parsimonious explanation behind the Gloucester Sea Serpent is as early evidence for what is today recognized as being one of the most serious threats to marine biodiversity entanglement in fishing gear and other maritime debris Therefore although widely considered to be restricted to the advent and widespread use of non degradable plastic in the middle of the twentieth century this new interpretation of the Gloucester UMO suggests that entanglement has a much longer environmental history than is commonly believed Robert L France is a world renowned scientist at Dalhousie

University and the author or editor of twenty books and two hundred papers on a wide range of environmental subjects He has undertaken conservation biology research from the High Arctic to the tropics on organisms from bacteria to whales which has been cited many thousands of times in the literature Dr France is a leading authority on many aspects of aquatic zoology including marine ecology and ethnozoology and may be the most qualified person to have recently undertaken research and published peer reviewed articles on the beguiling and befuddling topic of aquatic mystery animals known as cryptids

Down at the Docks Rory Nugent,2010-02-09 In the opening pages of Moby Dick Herman Melville called New Bedford Massachusetts the dearest place to live in in all of New England But the old fishing port and manufacturing center once one of the richest cities in New England has withered in the modern economy Its once prosperous fishermen now struggle with government regulations and fished out seas while its empty factories now offer more work to the Fire Department than anyone else In *Down at the Docks* Rory Nugent tells the riches to rags story of this iconic American town through beautifully told and unsentimental portraits of its residents Their lives inform a eulogy to the distinctive ideas traditions and culture that is about to disappear from the waterfront

Shakespeare's Ocean Daniel Brayton,2012 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In *Shakespeare's Ocean* Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from *The Comedy of Errors* to the valedictory *The Tempest* Brayton demonstrates Shakespeare's remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work

Kings of Their Own Ocean Karen Pinchin,2023-07-18 THE INSTANT INTERNATIONAL BESTSELLER Winner of the Evelyn Richardson Non Fiction Award Winner of the Margaret and John Savage First Book Award for Non Fiction Shortlisted for the Kobo Emerging Writer Prize Winner of the 2023 Science Writers and Communicators of Canada Paradigm Prize Finalist for the 2024 Edna Staebler Award for Creative Non Fiction Silver medalist in Culinary Narratives for the Taste Canada Awards This is a tale of human obsession one intrepid tuna the dedicated fisherman who caught and set her free the promises and limits of ocean science and the big truth of how our insatiable appetite for bluefin transformed a cottage industry into a global dilemma In 2004 an enigmatic charter captain named Al Anderson caught and tagged one Atlantic bluefin tuna off New England's coast Fourteen years later that same fish dubbed Amelia for her ocean spanning journeys was caught again this time in a Mediterranean fish trap Over his fishing career Al marked more than sixty thousand fish with plastic tags an obsession that made him nearly as many enemies as it did friends His quest landed him in the crossfire of an ongoing fight between a booming bluefin tuna industry and desperate conservation efforts a conflict that is once again heating up as overfishing and climate change threaten the fish's fate *Kings*

of Their Own Ocean is an urgent investigation that combines science business crime and environmental justice Through Karen Pinchin s exclusive interviews and access interdisciplinary approach and mesmerizing storytelling readers join her on boats and docks as she visits tuna hot spots and scientists from Portugal to Japan New Jersey to Nova Scotia and glimpse as Pinchin does rays of dazzling hope for the future of our oceans *Mercury Pollution* Sharon L. Zuber,Michael C. Newman,2016-04-19 How does mercury get out of the ground and into our food Is tuna safe to eat What was the Minamata Disaster Mercury Pollution A Transdisciplinary Treatment addresses these questions and more The editors weave interdisciplinary threads into a tapestry that presents a more complete picture of the effects of mercury pollution and provides new way *Slow Death by Rubber Duck* Rick Smith,Bruce Lourie,2009-12-10 This hard hitting look at hazardous everyday chemicals instills hope for a future in which consumers make safer more informed choices Washington Post Pollution is no longer just about belching smokestacks and ugly sewer pipes now it s personal The most dangerous pollution it turns out comes from commonplace items in our homes and workplaces To prove this point for one week Rick Smith and Bruce Lourie ingested and inhaled a host of things that surround all of us Using their own bodies as the reference point to tell the story of pollution in our modern world they expose the corporate giants who manufacture the toxins the government officials who let it happen and the effects on people and families across the globe This book the testimony of their experience also exposes the extent to which we are poisoned every day of our lives from the simple household dust that is polluting our blood to the toxins in our urine that are created by run of the mill shampoos and toothpaste Ultimately hopeful the book empowers readers with some simple ideas for protecting themselves and their families and changing things for the better

The Limits of Maritime Jurisdiction Clive H.
