Brazil as a Rising Power Kai Michael Kenkel, Philip Cunliffe, 2016-01-08 This book examines the normative tensions inherent in upward mobility within the international system focusing particularly on the clash between sovereign self interest and the putatively universal norms associated with international interventions It provides extensive detail and deep analysis of Brazil s nature as a rising power and that nature s implications for how the country crafts its international profile on issues such as intervention In addition the book proposes innovative ways of re organising thematic conceptual and empirical research on the normative behaviour of emergent powers with regard to institutions of global governance and

questions of intervention In analysing what distinguishes Brazil as a rising power the contributors begin from the assumption that participation in intervention is an increasingly crucial element in demonstrating the capacity and responsibility for which demand accrues as a state seeks increased international profile As such the debates around intervention serve as an indicative locus for examining the clash of norms that accompanies emergence as a global player The book s approach is to organise the analysis around thematic rather than chronological or praxis based lines using the Brazilian case as an illustrative example capable of extrapolation to other emerging powers such as Turkey India and others This work draws together rich empirical detail with sophisticated and varied conceptual analysis and will be of interest to scholars of international relations Latin American politics and global governance [Rising Powers and Peacebuilding](#) Charles T Call, Cedric de Coning, 2017-08-29 This book is open access under a CC BY 4.0 license This edited volume examines the policies and practices of rising powers on peacebuilding It analyzes how and why their approaches differ from those of traditional donors and multilateral institutions The policies of the rising powers towards peacebuilding may significantly influence how the UN and others undertake peacebuilding in the future This book is an invaluable resource for practitioners policy makers researchers and students who want to understand how peacebuilding is likely to evolve over the next decades

[The Rise of the GCC States and Turkey](#) Emad Y. Kaddorah, 2021-09-24 The GCC states and Turkey have recently experienced economic growth and played influential regional roles In tandem their relationships grew significantly and Turkey was considered for a while as a strategic partner Common challenges have made them consider an alliance to balance other powers and threats However many emerging issues have turned them into rivals for regional influence on divergent agendas during the last decade All in all their relations are dynamic and rapidly changing Some regional crises were subjects of political agreement and coordination in their early stages such as the cases in Libya Syria and Yemen However this agreement has diminished and sometimes turned into conflict Iran s policies have also led to its change from being a factor of agreement to a factor of difference On the other hand some tensions which were major causes of escalation were resolved or eased such as the Gulf crisis and the contest over Egypt These relations affected the whole region as well as the great powers involved there Therefore this book studies the commonalities between the GCC states and Turkey and analyzes their differences All parties expressed their desire to restore cooperation despite continuing competition on some regional issues The book proposes some ideas that can be considered to make convergence possible again **Turkey's Pivot to the African Continent** Elem Eyryce Tepeciklioğlu, Francois Vreÿ, Bahar Baser, 2024-07-08 The book provides a comprehensive and long term assessment of Turkey s evolving role in Africa at different levels ranging from political to economic cultural and military ties It engage with discussions surrounding Turkey s strengths and weaknesses in its foreign policies targeting African countries Rather than taking policy discourses for granted the chapters in this volume unpack the overall effectiveness of Turkey s Africa strategy on the ground Starting with an analysis of Turkey s role conception as a centre

country the book continues with an examination of the impact of Turkey's embassies on trade with Africa. It also provides insights into the statements, accomplishments, and the effectiveness of Turkey's summit diplomacy with the continent, exploring the intricacies of resource control in its Africa policy beyond the conventional soft-hard power binary. The book delves into its humanitarian assistance during the Covid-19 pandemic, uncovers the maritime nexus in Turkey's African agenda, examines its arms exports to Africa, and elucidates the nature of these transactions. It offers a nuanced understanding of Turkey's growing engagement in the continent, making it an essential read for scholars, researchers, policy makers, and anyone intrigued by the dynamic interplay between Turkey and African countries. This book will be useful for students, researchers, and scholars of politics and international relations broadly and particularly relevant for anyone interested in Turkish foreign policy and politics, African politics, and Eurasian geopolitics. The chapters in this book were originally published as a special issue of the Journal of Balkan and Near Eastern Studies.

Vocabularies of International Relations after the Crisis in Ukraine Andrey Makarychev, Alexandra Yatsyk, 2016-10-26. The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty, the delegitimation of international institutions, and a declining role for global norms and rules. Did these events bring substantial correctives and modifications to the extant conceptualization of International Relations? Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the vitality and academic vigour of conventional concepts? These questions are the starting points for this book, covering conceptualisations from rationalist to reflectivist and from quantitative to qualitative. Most contributors agree that many of the old concepts, such as multi-polarity, spheres of influence, sovereignty, or even containment, are still cognitively valid yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple conceptual languages that the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

Theoretical Approaches to Turkish Foreign Policy Paul Kubicek, 2023-08-22. This volume, with contributions from well-respected experts on Turkey, examines how well different theories and frameworks in international relations explain various aspects of contemporary Turkish foreign policy (TFP). Exploring the value of both structural-neorealist and ideational-constructivist approaches, the book's theory-informed case studies on the features of TFP, including Neo-Ottomanism, the role of religion, and Turkey's relations with the European Union, the Middle East, Russia, and the United States, provide an analytical perspective on developments that have captured the attention of both academics and policymakers. More importantly, this collection examines the shift in Turkey's foreign policy stance from Western and secular, non-sectarian to Islamist, Turkist, Neo-Ottomanist, and Eurasianist.
