Translation and Big Details Jeroen Vandaele, 2023-12-11 In the age of big data, evidence keeps suggesting that small, elusive and infrequent details make all the difference in our appreciation of humanistic texts, film, fiction and philosophy. This book argues from a cross-disciplinary perspective that expertise in humanistic translation is precisely the capacity to capture those details that are bigger than they seem. In humanistic translation, the expert handling of big details usually serves audiences and the original, but *mala fide* translation also works: the details for subtle manipulation and audience deception. A focus on textual detail is therefore characteristic of humanistic translators but also compatible with central claims of the cultural turn in translation studies. This book, written by a scholar and teacher of literary, essayistic and audiovisual translation, endeavors to articulate a seemingly dual interest on textual detail and cultural analysis as a single one. It theorizes connections between micro and macro analysis between translation as detail and translation as culture, thus hoping to build bridges between humanistic translators and translation scholars. It acknowledges tensions between practice and theory and proposes a way forward: practitioners and scholars share ways of thinking, varieties of part-whole thinking that machines can never acquire.
